

Our SHOP “Limitations”

> Update 2021 The Main “User” ERROR in MALS Cart
-On-line SHOP Is NOT Filling in ALL the [Fields] required by
MAL & PayPal on the “PAYMENT FORM” > p3

MOST SHOP Carts (at least those at reasonable Cost !)
do seem to us fundamentally “flawed” in design !

Problems ? > BUT you can still treat “MAL’s Cart”
as a simple SHOPPING List to create YOUR RFQ /
> Go Purchase Order and submit to Us by E-mail
for our Manual processing.

You can still pay by CC using >
our far more reliable PINCH Gateway !
IF PP is still problematic !
But by all means “Try” our MALs PP On-line
!> & IT does work for Us !

- **Similarly Our other “proto” Shop(s)**
www.chromtech.net.au/shop2ct.htm
And from www.chromtech-us.com/shop/

Payment links to PayPal ? : but this in itself has been
a bit “flakey” in recent years as is a bit “woke” and
the Australian PP is NOT really supported in practice
& of course it is run remotely by the “Yanks” from
the US of A or “elsewhere” ?
. . . SE-Asia most probably ! > with some
CC & other Bank issues > STILL ! > within AUS !

> **Our SHOP “Limitations” Update 2021**
The Main “User” ERROR in MALS Cart
-On-line SHOP is NOT Filling in ALL the [Fields]
required by MAL & PayPal on the “PAYMENT FORM

see Example >
Form pic p3

MOST SHOP Carts (at least those at reasonable Cost !)
Do seem to us fundamentally “flawed” in design !

- OK maybe for the “twitter” mentality & for a few items ONLY
... Else > ALL becomes tedious & too cumbersome !
- NOT easily linked to Co “Accounting System(s)” > Inventory etc
- (we Use **Reckon** who seems NOT to have had the foresight to implement an integrated SHOPPING Cart yet !)
- Impossible for Inventory “tracking” over multiple system > E-Bay, Amazon et al are ALL “fatally flawed” (my opinion !)
- most rely on PayPal which in Australia is proving very “flakey” > (new Aus Bank Regulations etc)
- we NOW have implemented “PINCH Gateway” as an ALT for OUR CC payments
- At least we try and be consistent in applying this approach across Our various multiple “proto “Shop” systems !
ALL “improvised” as they might be !
- We ALL work for the **TAX Dept** ANYWAY ! but they don’t seem interested in enforcing regulations making such Integrated Accounting Systems “mandatory” AND certified as being USABLE !

Most SHOP Carts . . .

- > most frustrating is the hidden “scams”, false info > and many are completely devoid of any useful “technical info” !

**** We DO attempt NOT to do THIS ! ****

Chromtech > still does have some specific issues >

- dealing INT’ly . . . with quite variable Currency Exchange Rates (both Buying & Selling !) & OEM annual Price Adjustments > inflation etc
- Being a bit over ambitious we have some 30,000 items to manage even via XLS or Databases > beyond the scope of most “systems” > to maintain > to update etc
- “MegaBuck” Bunnings, Myers, HarveyNorman et al All manage to cope of course !

***And No wonder Aus is fast becoming but a
“Nation of Coffee Shops” . . . “ONLY” !***
