## SPLab10

### Model Number

- SPLab01 (1channel)
- SPLab02 (2channels)
- SPLab04 (4channels)
- SPLab06 (6channels)
- SPLab08 (8channels)
- SPLab10 (10channels)
- SPLab12 (12channels)

SPLab10-10 channel

### Features

- Chromatic LCD display: Friendly human-computer interface; Large-screen LCD displays each technical parameter in real time.
- Syringe selection: It can be selected in the manufacturer table or input the inner diameter of the syringe barrel directly.
- Two measurement ways for option:  
Infusion flow volume — Infusion speed rate  
Infusion flow volume — Infusion time
- Display the infusion flow volume in real time, and it has calibration function.
- Users can check and change the parameters during infusing, it comes with power-down memory function.
- Working mode: 6 working modes--Infusion, withdrawal, Infusion/withdrawal, withdrawal/infusion, continuous, additional mode (Infusion/withdrawal, then exclude bubble). The parameter of each working mode saved separately.
- Protection function: The pump will stall and give an alarm when the drive structure of the pump is blocked.
- External control interface: Switch signal control start/stop.

### Commonly used syringe reference flow injector

| Syringe    | Inside diameter(mm) | Flow rates( $\mu$ L/min-mL/min) |                 |
|------------|---------------------|---------------------------------|-----------------|
|            |                     | SPLab01/SPLab02                 | SPLab03-SPLab10 |
| 50 $\mu$ L | 1.03                | 0.004~0.110                     | 0.004~0.110     |
| 1mL        | 4.61                | 0.083~2.203                     | 0.083~2.203     |
| 2.5 mL     | 7.28                | 0.208~5.492                     | 0.208~5.492     |
| 5 mL       | 10.30               | 0.417~10.993                    | 0.417~10.993    |
| 10 mL      | 14.57               | 0.834~21.997                    | 0.834~21.997    |
| 25 mL      | 23.03               | 2.083~54.958                    | —               |
| 50 mL      | 32.57               | 4.166~109.921                   | —               |
| 60 mL      | 32.57               | 4.166~108.310                   | —               |

### Installation Sizes Drawing (Unit: mm)

| Channel number | L   |
|----------------|-----|
| 4              | 145 |
| 6              | 190 |
| 8              | 235 |
| 10             | 280 |
| 12             | 325 |

SPLab04

SPLab10

## SPLab02

SPLab02–Dual channel

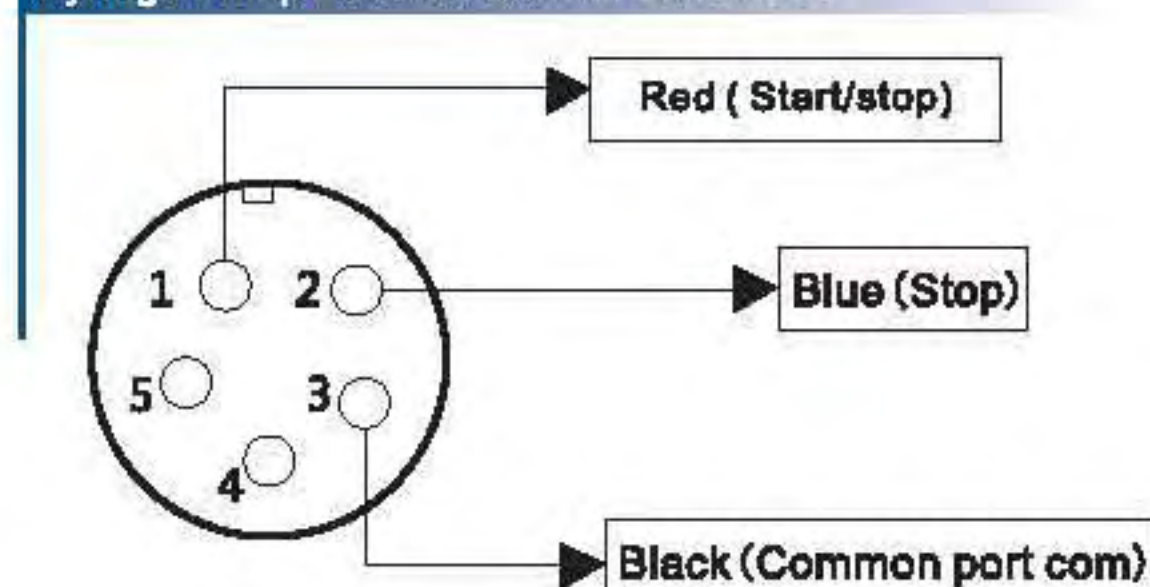

SPLab01–Single channel

### Product Introduction

Dual channel syringe pump with infusion/withdrawal mode, stainless steel body, and large-screen chromatic LCD is easy to operate. It can install and fix different types of injectors or syringes in the same time, and is suitable for transferring micro flow rates with high precision (non-medical).

#### Syringe Pump External Control Schematic

### Installation Sizes Drawing (Unit: mm)

## EM-MiniPump

### Product Introduction

MiniPump series peristaltic pump use 42 stepper motor drive, small size, low noise. Embedded design, compact structure, fine appearance. OLED screen display the motor speed, direction and working status. The pump with external control interface can achieve external control, also can be controlled by computer.

### Features

- Embedded design, small space, standard Industrial housing, more easy installation.
- OLED screen display.
- RS485 with MODBUS protocol, connect with PLC and HMI more easily and directly.
- Analog signal input interface, connect with inverter easily. EM-MiniPump external control use standard terminals, more suitable for industrial equipment.
- Low consumption, low noise.

## SP-MiniPump

### Product Introduction

SP-MiniPump series peristaltic pump, 304 stainless steel housing, stepper motor drive. OLED screen, display the current motor speed, direction and working status. Digital knob and toggle switch control speed and direction separately. External control with standard terminal, multiple external interface, support RS485 (MODBUS protocol, RTU mode).

### Features

- 304 stainless steel housing, resisting corrosion, small space.
- Digital knob control speed, toggle switch control direction and start/stop.
- RS485 standard MODBUS protocol, more convenient to connect with PLC.
- Standard connection terminals, various external control function, more suitable for equipment.

## Warmly celebrate Baoding Shencheng Precision Pump Co., Ltd is awarded as Baoding Peristaltic pump Engineering Technology Research Center.

Celebrating "Baoding Peristaltic Pump Engineering Technology Research Center" co-established by overnment and Baoding Shencheng Precision Pump Co.,Ltd.

Shencheng Precision Pump achieves to great success in world market depends on technical strength, good cooperate reputation, high quality and unique patented products, and received a lot of attention from Baoding government, Technology Bureau, especially Mayor. After survey, investigation and many times judgment of Shencheng by specialists and professional users, Government and Baoding Shencheng Precision Pump Co.,Ltd co-establish "Baoding Peristaltic Pump Engineering Technology Research Center" which is the only authority research institution in Baoding peristaltic pump industry.

### Lab2015 Product Introduction

Intelligent flow rate peristaltic pump with ABS engineering housing, streamlined body design. Industrial grade 4.3 inch true color LCD screen, touch screen control. Speed range: 0.1-100rpm, flow rate range: 0.000067-380ml/min. Dynamic display transferring status, flow rate data, setting parameters. The system configuration displays in the same screen. Calibration and online micro adjusting function. 3 measurement mode: fixed volume measurement, fixed time and volume, timer start and stop. Meeting multiple complicate transferring requirement. It is the ideal choice for laboratory , instruments and industrial production.

### Lab2015 Product Composition and Flow rate Range

| Drive   | Speed Range(rpm) | Pump Head   | Tubing Size                    | Flow Rate(ml/min) |

## LabV1

### LabV1/LabV3/LabV6

1. Portable handheld design, feel comfortable and stable.
2. Delicate touch pen design.
3. Multifunction protective cover for external control interface, can be used for tool box, install common tools.
4. Hidden external control interface, protective cover can protect the interface and data lines effectively.

## Product Introduction

Intelligent type flow rate peristaltic pump, with ABS engineering plastic housing, streamlined body design. Industrial grade 4.3" color display with touch screen control. Speed range is 0.1–600 rpm, flow rate ranges 0.000067–2280 ml/min. Dynamic display transferring status. Flow rate data, setting parameters and system configuration display in the same screen. Intelligent calibration and online micro adjusting function. 3 kinds of metering mode: fixed volume metering, fixed time and volume, timer start and stop, meet different transferring and dispensing request. The unique motor working status output signal, can be used for other equipments monitoring the peristaltic pump working status. Various external control modes for option, also have programmable external control mode. Support RS232 and RS485 Interface, standard MODBUS communication protocol, achieve external control under different industrial conditions. It is the ideal choice for laboratory, instrument and industrial production.

### Suitable Pump Head

Multichannel Pump Head (MC1-MC12)

Easy Load Pump Head (YZ1515x, YZ2515x)

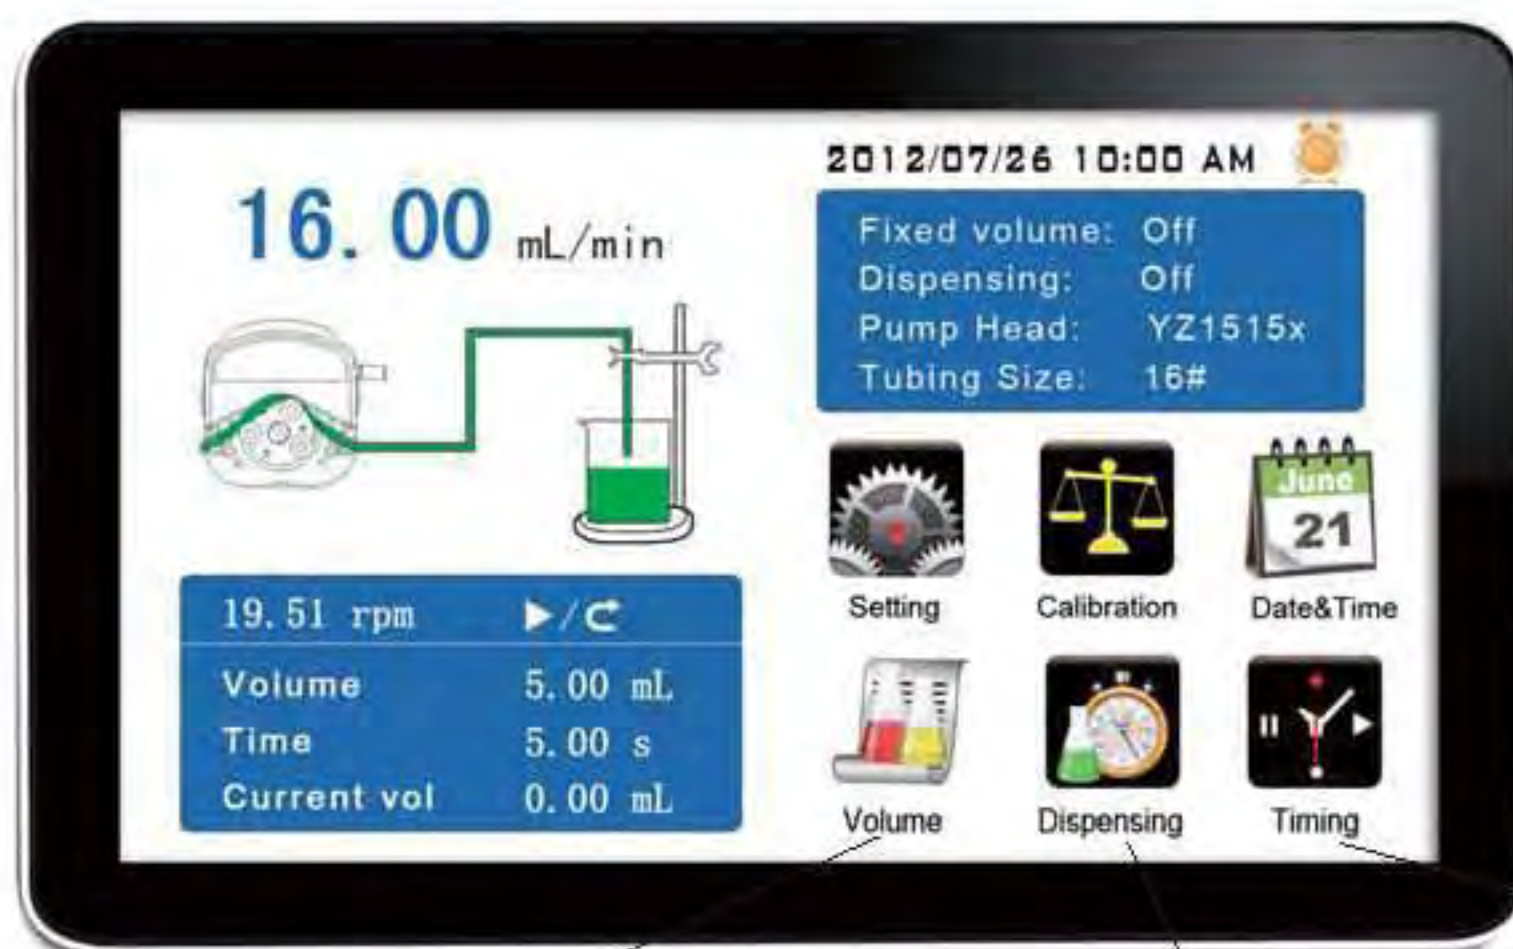

Multichannel Pump Head (DG1-DG12)

Fast Load Pump Head (DZ25-3L)

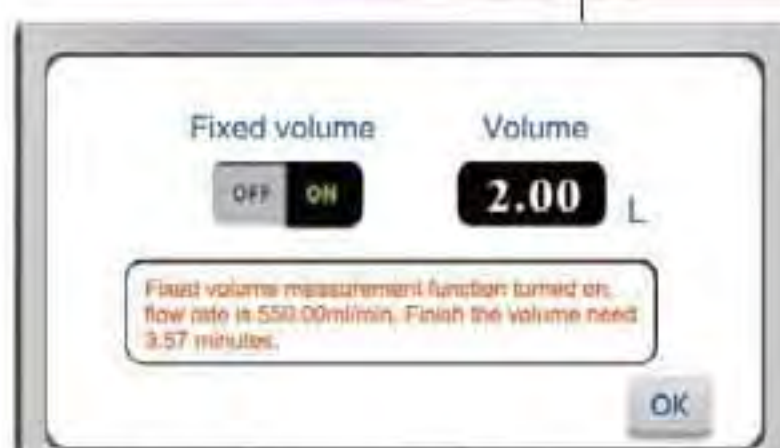

Standard Pump Head (SN15, SN25)

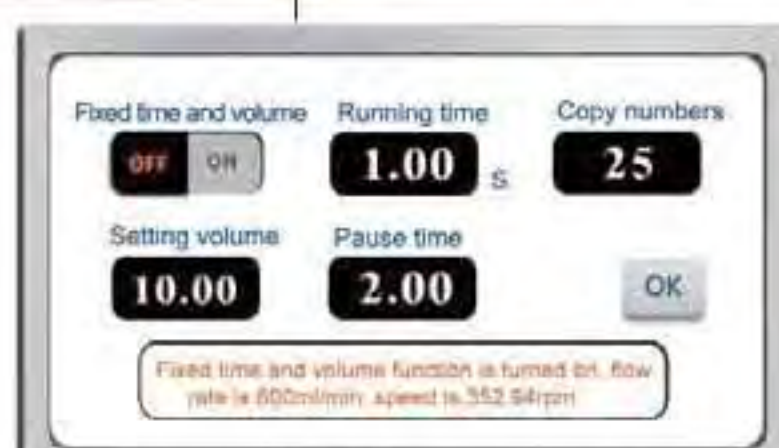

Flow Setting Interface

External control speed setting interface

Fixed Volume Measurement Setting Interface

Fixed Time and Volume Setting Interface

Timer Start and Stop Setting Interface

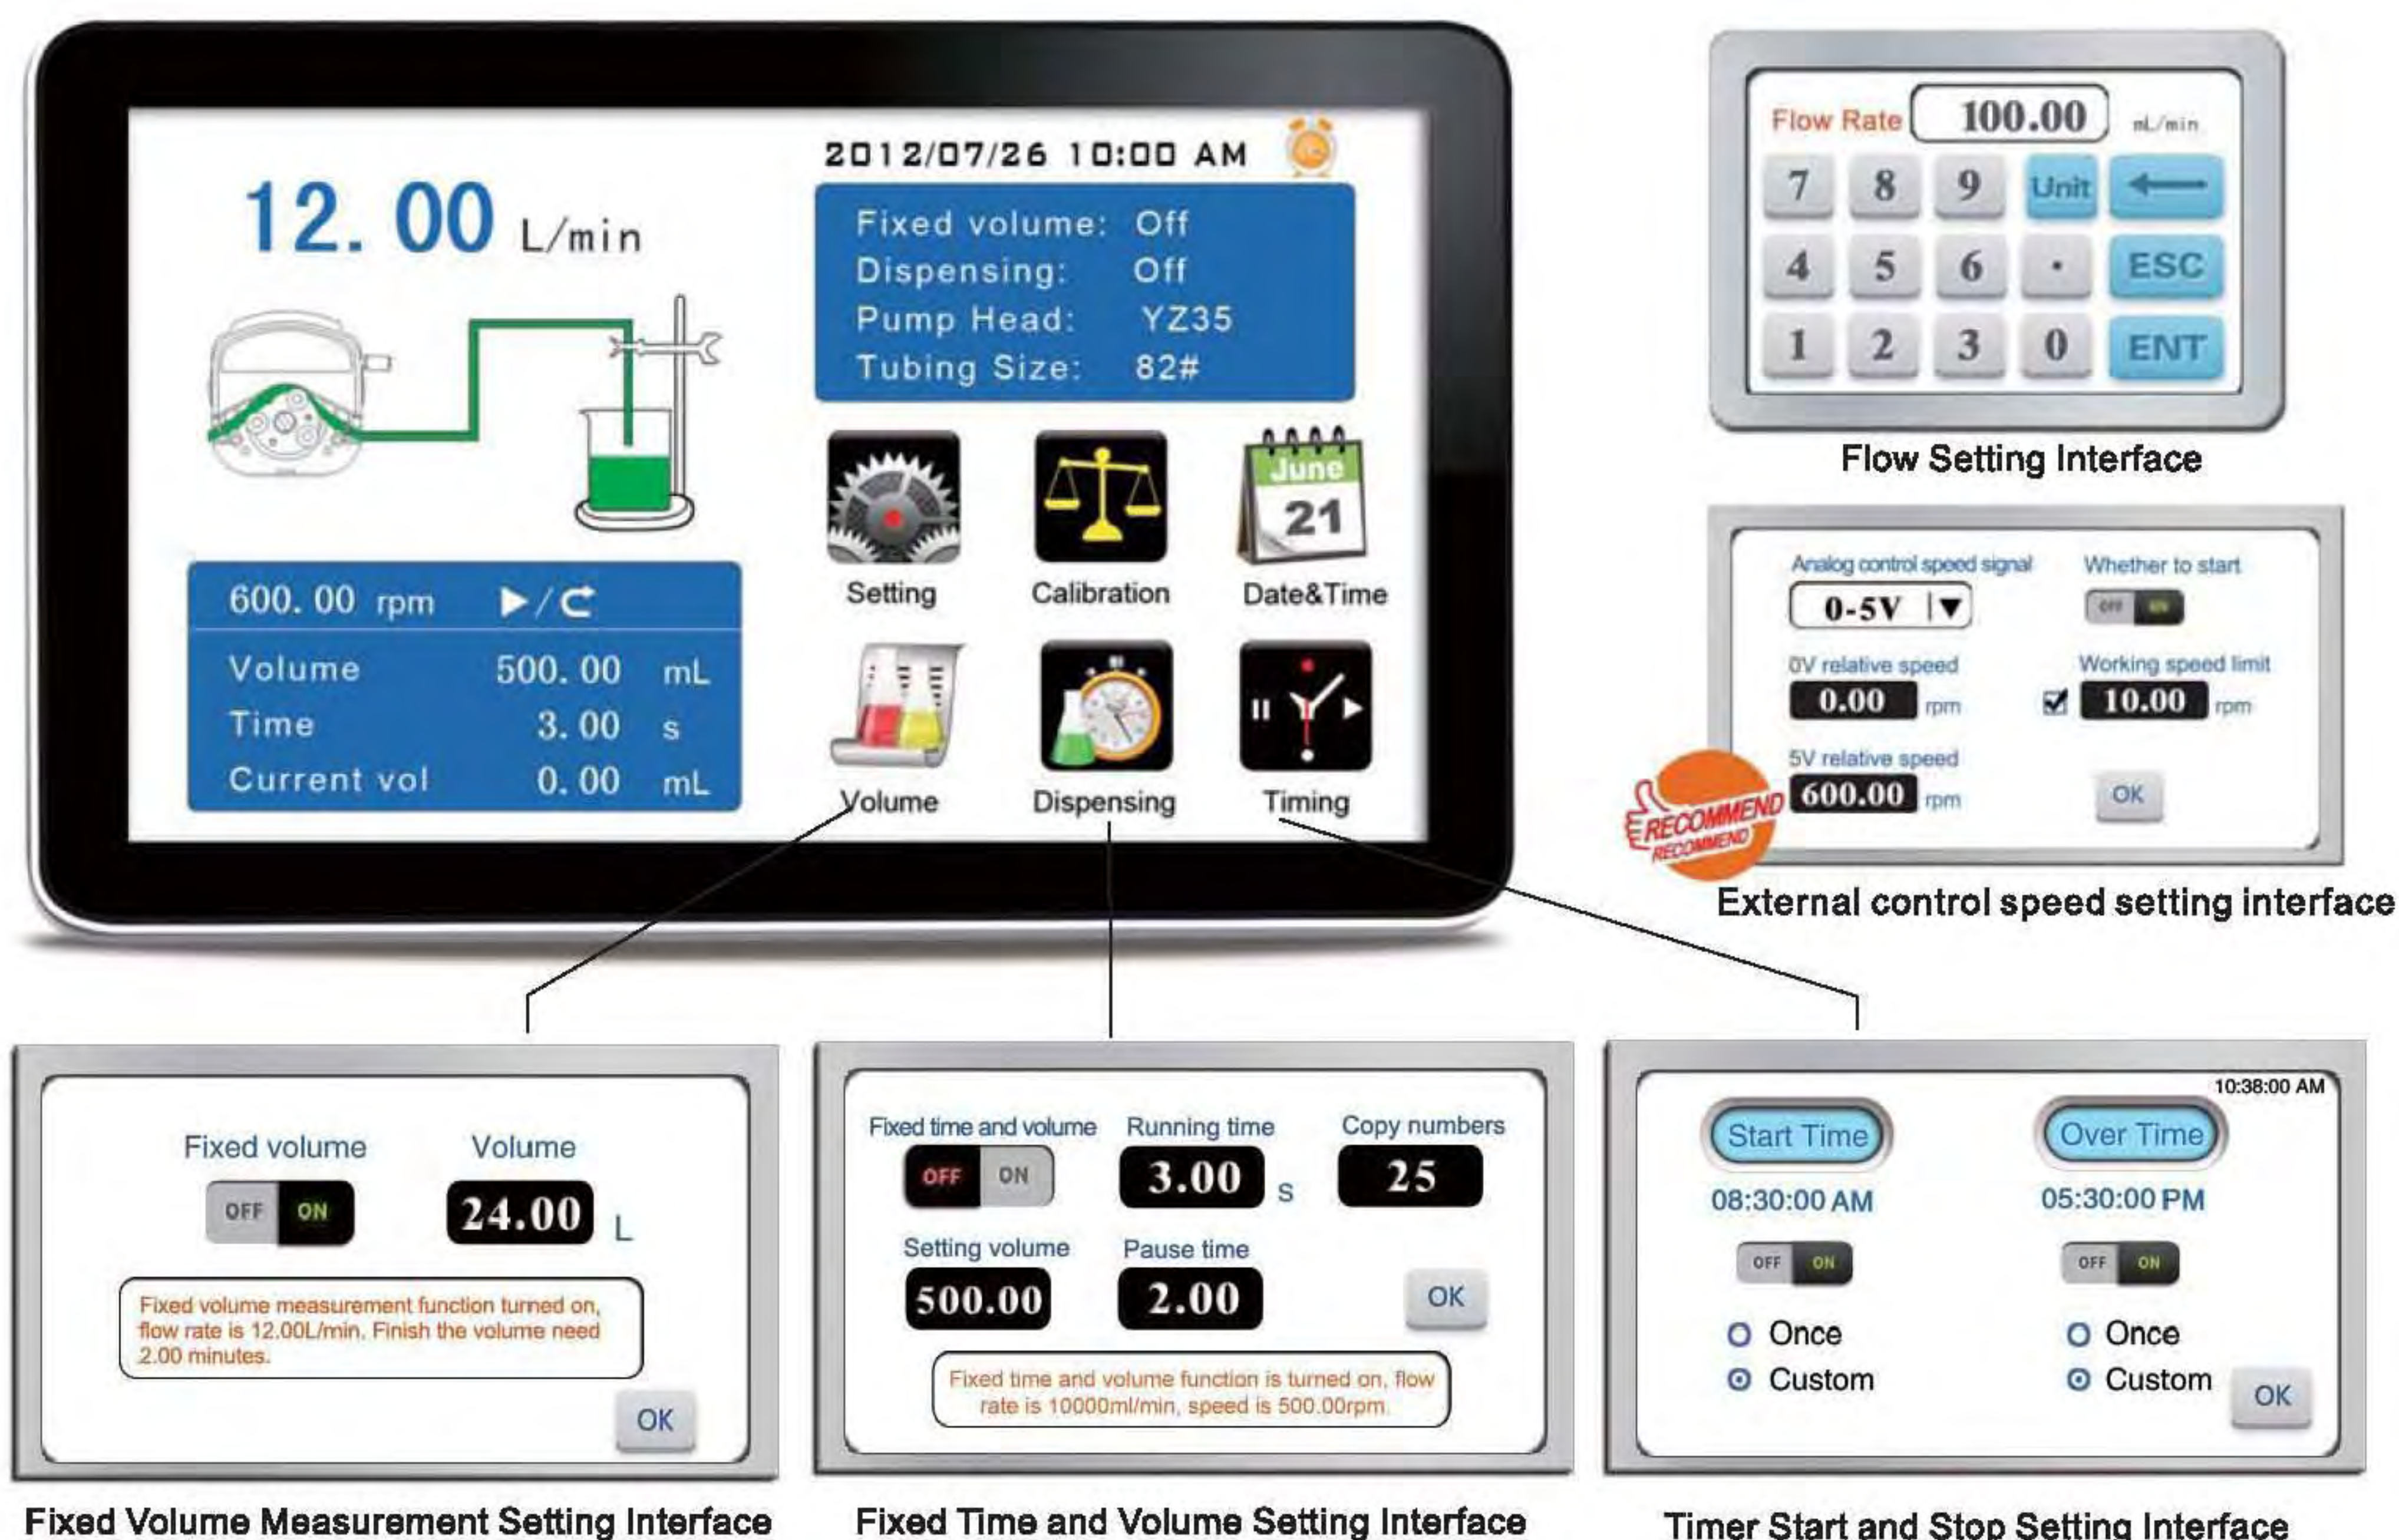

# Flow Rates Peristaltic Pump

## Product Introduction

Intelligent flow rate type industrial peristaltic pump with **servo motor drive**, use 4.3" color display with touch screen control. Speed range: 0.1–600 rpm. **Flow rate range: 0.000211–12 L/min**. Dynamic display transferring state, flow rate data, setting parameters and system configuration in the same screen. Intelligent calibration and online micro adjusting function. 3 measurement mode: fixed volume measurement, fixed time and volume, timer start and stop, meet different transferring and dispensing requirement. Unique motor working status output signal, can be used for other equipments monitoring the peristaltic pump working status. Plenty external control mode for option, also have programmable external control mode. The pump support RS232 and RS485 interface with standard MODBUS protocol to achieve external control in different industrial conditions. It is the first choice for high level industrial sites, large flow rate, high precision and intelligent control liquid transferring.

# Flow Rates Peristaltic Pump

## Features

- Imported 4.3" color display with touch screen, clear picture quality, more guarantee quality. Dynamic display working state, flow rate, rotation speed, setting parameters and system setting in the same screen.
- Imported touch screen operation, high hardness, antiscratch, high sensitivity, pay attention to users' experience.
- Servo motor drive, precise control, strong power, low vibration and low noise.
- Shenzhen-V-CIR circuit system, use imported chips, computing speed fast, reliable performance, working stable.
- Shenzhen-V-EMB operation system, embedded software design, powerful function, friendly interface, pay attention to users' experience.
- Intelligent calibration function, can calibrate the flow rate or dispensing volume, ensure the flow rate accuracy. Suitable for high precision transferring liquid.
- Fixed volume measurement function: After turn on this function, the pump will measure the liquid volume automatically, it will stop automatically after the volume reach the set value. During the process, you can change the flow rate freely. It is suitable for laboratory liquid dosing and chemical reaction process.
- Fixed time and volume: After turn on this function, the pump will transfer fixed volume within set time. It is suitable for liquid dispensing in laboratory and industrial production.
- Timer start and stop function: Can set the pump start and stop time freely, reach automated control.

- Plenty external control function, besides start/stop, direction, speed control, RS485/RS232 interface, our pump have Shenchahn-V-EMB-PGM programmable external control function to meet special industrial control request.

### External Control Schematic

- Online micro adjusting function. During the production process, if the tubes fatigue or abrasion, you can use the online micro adjusting function to adjust the flow rate without stopping the pump.
- Unique accurate angle control technology, achieve high accuracy dispensing and dosing.
- Self-filling function, not only can be used for washing the tubing, but also fill liquid to the tubing fast.
- Automatic temperature control system, reducing the fan noise effectively.
- Self-shedding memory function, store the running parameters in time, safe and reliable.
- Strong anti-jamming feature, wide voltage design, suitable for complex power supply environment.
- Circuit board spray with three paint, anti-dust, anti-moisture, anti-static, resist corrosion.
- 304 stainless steel housing, comply with pharmaceutical GMP certificate requirement. Meantime, use seamless welding technology, avoid accidental spilled liquid on the housing infiltrate inside, to protect the inside circuit board.
- DZ25-3L, DZ25-6L and YZ35 aluminum alloy pump head, 304 stainless steel rollers, strong rigidity, high accuracy, reliable performance, excellent quality.

➤ V Series peristaltic pump has various external control interface, can meet different equipment matching requirements.

#### ● External control interface definition

1. Analog signal Input port: Choose the external control speed signal from the external control setting interface. Turn on the external control speed function, control the motor speed range through the analog signal.
2. Internal isolation 5VDC output.
3. External control start/stop, reversing signal input port: active signal Input.
4. R/S1 external control start/stop signal input port: passive signal input.
5. Motor running status output port: output current running status of the motor.
6. RS232 interface: choose RS232 in communication setting interface, this port is effective.
7. RS485 interface: choose RS485 in communication setting interface, this port is effective.

➤ V Series peristaltic pump external control setting interface.

#### ● Choose external control start/stop, direction signal

1. Can set external control start/stop or reversing switch whether effective or not respectively.
2. Can choose control mode according to requirement: pulse mode or level mode.
3. Can set the foot switch whether effective or not.
4. Can choose switch value signal 's high level values according to customers' main control equipment: 5V(default), 12V, 24V.

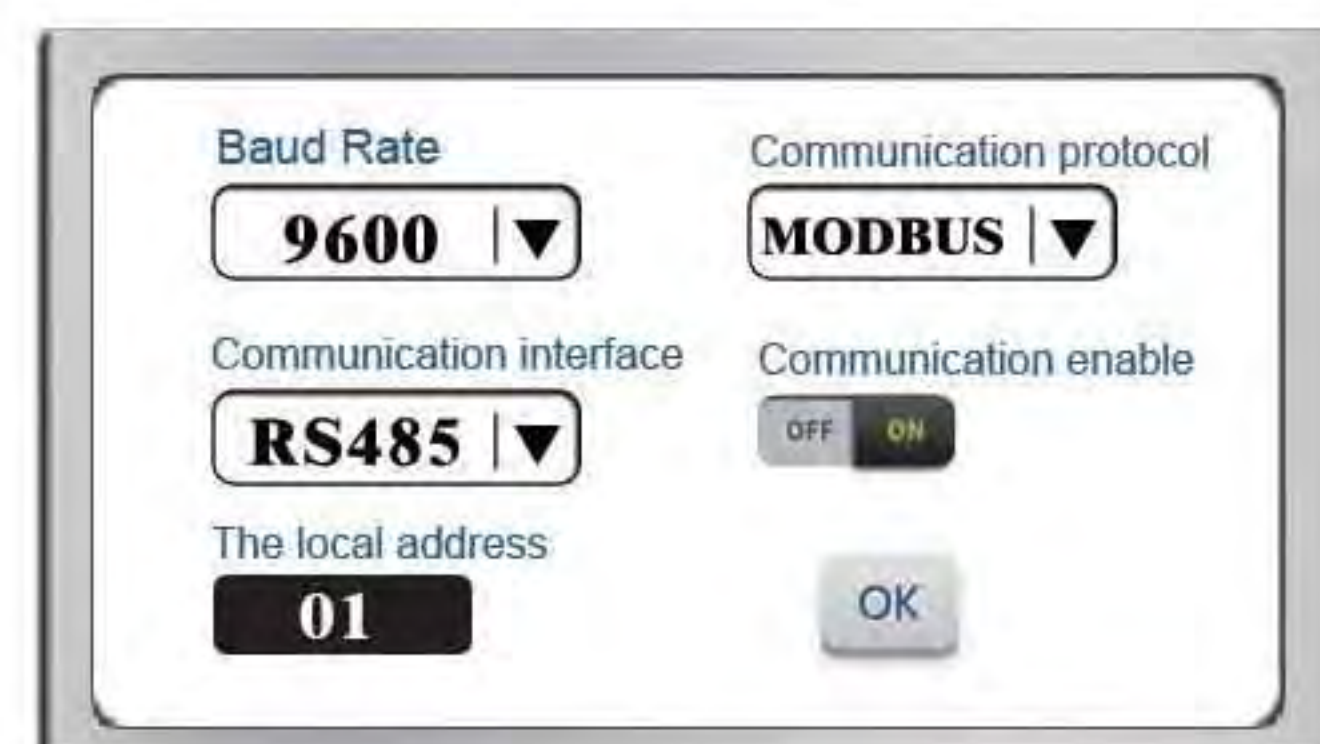

#### ● Programmable external control speed setting

1. Can choose analog signal source according to requirements: 0-5V, 0-10V, 4-20mA.
2. When the signal source is chosen, can choose maximum speed and minimum speed which corresponding to the signal source's maximum value and minimum value according to actual demand, to reach user-defined rotate speed range purpose.
3. Working speed limit is at the situation that the linear relation of analog quantity signal and rotating speed keeps invariant, set peristaltic pump's maximum working rotate speed. This setting can avoid production accident caused by sudden change of transfer fluid amount with the sudden change of external analog signal.

#### ● Communication Setting

1. Support RS232 and RS485 Interface, can be chosen in software interface.
2. Support various Baud rate : 2400bps, 4800bps, 9600bps, 19200bps.
3. Can choose standard modbus communication protocol or Shenzhen communication protocol to control, modbus communication protocol is suitable to match with Industrial site HMI, PLC or other upper computer which support standard modbus communication protocol; Shenzhen communication protocol is suitable to match with Single-chip micro computer or upper computer on computer programme.

# Flow Rates Peristaltic Pump

## TC50

TC50

304 stainless steel housing

Special for flow injection analyzer

### Product Introduction

Servo motor drive TC50/MT12 peristaltic pump, **special for flow injection analyzer**. MT12 pump head, use overall block design to improve the accuracy between channels. The error between channels < 3%. TC50 control unit, use 4.3" color display with touch screen control. Speed range: 0.1-50 rpm, **flow rate range: 0.0016-10.5 mL/min**. Dynamic display the transferring status, flow rate, setting parameters and system configuration in the same screen. Intelligent calibration and online micro adjusting function. 3 measurement modes: Fixed volume measurement, Fixed time and volume, Timer start and stop achieve different transferring and dispensing request. Unique motor working status output signal, can be used for other equipments to monitor the peristaltic pump working state. Different external control modes for selection, also have programmable external control mode. Support RS232 and RS485 interface, MODBUS protocol. The TC50 pump is the first choice for multichannel, high precision and micro flow rate liquid transferring.

### Features

- Imported 4.3" color display with touch screen, clear picture quality, more guarantee quality. Dynamic display dispensing status, dispensing volume, dispensing time, pause time, copy numbers and system setting in the same screen.
- Imported touch screen operation, high hardness, anti-scratch, high sensitivity, pay attention to users experience.
- Stepper motor drive, control precisely.
- Shenzhen-F-CIR circuit system, use imported chips, computing speed fast, reliable performance, working stable.
- Shenzhen-F-EMB operation system, embedded software design, powerful function, friendly interface, pay attention to users' experience. Shenzhen-F-EMB operation system with **unique accurate angle control technology**, achieve high accuracy liquid filling and dispensing.
- Intelligent calibration function, can calibrate the flow rate or dispensing volume, ensure the flow rate accuracy. Suitable for high precision liquid filling.
- The dispensing total number counting function, need to clear the numbers by manual. This is convenient for counting dispensing numbers when manual dispensing.

### Product Introduction

Intelligent type dispensing peristaltic pump, with ABS engineering plastic housing, streamlined body design. Industrial grade 4.3" color display with touch screen control. Can preset dispensing volume, dispensing time, pause time, copy numbers and back suction angle. Dynamic display the working status, dispensing data, setting parameters and system configuration in the same screen. Intelligent calibration and online micro adjusting function. Can connect with foot pedal or receive switch signal, achieve external control. The unique motor working status output signal, can be used for other equipments monitoring the peristaltic pump working status. This pump suitable for large flow volume, high efficiency and precision filling.

### Suitable Pump Head

### Typical Application

- Widely used in medicine and chemicals, such as oral liquid, diagnostic reagents.
- Cosmetic dispensing, such as perfume, lip gloss.

- Online micro adjusting function.** During the production process, if the tubes fatigue or abrasion, you can use the online micro adjusting function to adjust the flow rate without stopping the pump.
- The pump can store 60 commonly used filling modes, save users setting time.
- Back suction angle setting, avoid liquid drop off when the pump stop working.
- External control start/stop function, it can connect with foot pedal switch, also can be unified controlled by the host computer when working in filling line.
- Automatic temperature control system, reducing the fan noise effectively.
- Power down memory function, store the running parameters in time, safe and reliable.
- Fast filling function, not only can be used for washing the tubing, but also can fill liquid to the tubing fast.
- Strong anti-jamming feature, wide voltage design, suitable for complex power supply environment.
- Circuit board spray with three paint, anti-dust, anti-moisture, anti-static, resist corrosion.

PPS material pump head or Aluminum alloy pump head and stainless steel drive housing  
F6-12L/YZ35、F6-6L/DZ25-6L、F6-3L/DZ25-3L

## Product Introduction

Servo motor drive intelligent dispensing industrial peristaltic pump, use imported 4.3" color display with touch screen control, can preset the dispensing volume, dispensing time, pause time, copy numbers and back suction angle. Dynamic display the working status, dispensing parameters, setting parameters, system configuration in the same screen. Intelligent calibration and online micro adjusting function. Can connect with foot pedal or receive switch signal, achieve external control. Unique motor working status output signal, can be used for other equipments monitoring the peristaltic pump working status. This pump is suitable for large flow volume, high efficiency and high accuracy filling. Such as: filling 500ml, the efficiency is 15 bottles per minute. Accuracy is  $\pm 0.5\%$ .

## Features

- Imported 4.3" color display with touch screen, clear picture quality, more guarantee quality. Dynamic display dispensing status, dispensing volume, dispensing time, pause time, copy numbers and system setting in the same screen.
- Imported touch screen operation, high hardness, anti-scratch, high sensitivity, attention users' experience.
- Servo motor drive**, precise control, strong power, low vibration and low noise.
- Shenzhen-F-CIR circuit system, use imported chips, computing speed fast, reliable performance, working stable.
- Shenzhen-F-EMB operation system, embedded software design, powerful function, friendly interface, pay attention to users' experience.
- Shenzhen-F-EMB operation system with unique accurate angle control technology, achieve high accuracy dispensing and dosing.
- Intelligent calibration function**, can calibrate the flow rate or dispensing volume, ensure the flow rate accuracy. Suitable for high precision liquid filling.
- Online micro adjusting function**. During the production process, if the tubes fatigue or abrasion, you can use the online micro adjusting function to adjust the flow rate without stopping the pump.
- The pump can store 60 commonly used filling modes, save users setting time.
- Back suction angle setting, avoid liquid drop off when the pump stop working.
- External control start/stop function**, it can connect with foot pedal switch. The pump also can be unified controlled by the host computer when working in filling line.
- Automatic temperature control system, reducing the fan noise effectively.
- Load-shedding memory function, store the running parameters in time, safe and reliable.
- Fast filling function, not only can be used for washing the tubing, but also can fill liquid to the tubing fast.
- Strong anti-jamming feature, wide voltage design, suitable for complex power supply environment.
- Circuit board spray with three paint, anti-dust, anti-moisture, anti-static, resist corrosion.
- 304 stainless steel housing, comply with pharmaceutical GMP certificate requirement. Meantime, use seamless welding technology, avoid accidental spilled liquid on the housing infiltrate inside, to protect the inside circuit board.
- DZ25-6L aluminum alloy pump head, 304 stainless steel rollers, strong rigidity, high accuracy, reliable performance, excellent quality.

# Low Pulse Dispensing Peristaltic Pump

**IF3**  
304 stainless steel housing

**INDUSTRIAL**  
Intelligent Type

**Servo Motor Drive**

## Product Introduction

Servo motor drive intelligent high precision, low pulse dispensing peristaltic pump. Imported 4.3 inch industrial true color LCD screen display, touch screen control. Speed range: 1-350rpm, flow rate range: 0.1-4340mL/min. Preset dispensing volume, dispensing time, pause time, copy numbers and back suction angle. Dynamic display working status. Dispensing data, setting parameters and system configuration display in the same screen. **Intelligent calibration and online micro adjusting function.** The pump can connect with foot pedal switch or receive switch signal, achieve external control. The unique motor working status output signal, can be used for other equipments monitoring the peristaltic pump filling status in realtime. **The 'Low Pulsation' pump head, special design for high precision filling. Through the phase difference between the two sets of rollers, make the fluid peaks and valleys complementary, then reduce the pulsation of the fluid.** Adaptive pressure tubing space, extend the tubing lifetime effectively, actually achieve micro flow rate and large flow rate high precision dispensing.

## Installation Sizes Drawing (Unit: mm)

IF3

IF3 External Control Schematic

## Product Composition and Flow Rate Range

| Drive | Motor Type  | Pump Head | Tubing Size                       | Speed Range(rpm) | Flow Rate Range(mL/min) |
|-------|-------------|-----------|-----------------------------------|------------------|-------------------------|
| IF3   | Servo Motor | DY15      | 13', 14', 19', 16', 17', 18', 25' | 1-350            | 0.1-3337                |
|       |             | DY25      | 15', 24', 35', 36'                |                  | 4.2-4340                |

## Filling Volume Reference Parameter(Media is water)

| Tubing | Filling Volume | Filling Time | Actual Filling Volume(mL) |        |        |        |        |        |        |        |        |        | Filling Accuracy |        |

## DF600

High accurate  
filling

INDUSTRIAL  
Intelligent Type

### Product Introduction

DF series intelligent type integrated filling system, consist of control unit and integrated filling units, each group have 4 filling units. One controller control 4 groups, total 16 filling units. 4.3" color display with touch screen control, can preset the filling volume, filling time, pause time, copy numbers and back suction angle. Dynamic display the working status, filling data, setting parameters and system configuration in the same screen. Intelligent calibration and online micro adjusting function. The system can connect with foot pedal switch or receive switch signal, to achieve external control. The unique motor working status output signal, can be used for other equipments monitoring the pump filling status. Pay attention to users' experience, suitable for non-pollution, high precision fluid filling. The filling precision is 0.5%-1%.

### Typical Application

- Pharmaceutical, health product filling, diagnostic reagent dispensing
- Food, beverage filling
- Cosmetic dispensing

### Features

- Accurate angle control technology, high precision filling.
- Color touch-screen control, friendly interface, dynamic display filling state, also display the filling parameter and system settings in the same screen.
- Intelligent calibration function, it will calibrate the filling volume before production to ensure the filling accuracy, help you to improve the working efficiency.
- The online calibration and micro adjusting function, more convenient to calibrate or micro adjust the filling unit during production progress. It can avoid the filling errors because of tubing fatigue and elasticity decreased.
- Extend filling units on one controller freely, save cost.
- Real-time monitor, dynamic display the results of the monitoring. With alarm function, ensure the safety in production.
- The filling system can store 60 commonly used filling modes, save users setting time, and improve working efficiency.
- Back suction angle setting avoid liquid drop off when the pump stop working.

### Model Number

- DF600
- DF600 Plus
- DF600 II
- DF600 Plus II

### DF600 Plus

Connected with HMI, PLC etc. industrial control system, one controller can control 4 groups total 16 filling units. It can display the details of 16 filling units in the HMI, widely used for industrial control occasion.

## DF600 Plus

- Effective unit setting, you can start or stop any filling channel during it working, meet different channel numbers requests.
- External control start and stop function, make it can be unified controlled by the host computer when working in filling line.
- Each filling units accept stop filling signal when bottle absent, reach single channel stop filling with bottle absent.
- Fast filling liquid function, not only can wash the tubing, but also can fill liquid in the tubing.
- Separate controller and filling units, can install the controller where is convenient to operate.
- 304 stainless steel housing, resist corrosion, no rust, conform to GMP sanitary request.

# Filling System (Integrated Type)

Installation Sizes Drawing (Unit: mm)

- DF600 with unique motor working status output signal, can be used for other equipments monitoring the pump filling status.
- DF600 plus use standard MODBUS communication protocol, can be connected with HMI to accomplish logical control.

DF600 External Control Schematic

# Filling System (Integrated Type)

## CF350 (servo control)

### Features

- **Servo motor drive**, precision control.
- **Split type design**, space-saving, easy installation.
- Imported 4.3" Industrial grade true color display, clear picture quality, the quality is more guaranteed. Animation display current filling status, display filling volume, filling time, pause time, copy numbers and system configuration at the same screen.
- Imported touch screen control, high hardness, scratch resistance, high sensitivity, pay more attention to users' experience.
- **Shenchen-CF-CIR** electrical system all use imported chips, fast operation, high performance and work steady.
- **Shenchen-CF-EMB** operation system, use embedded software design, the function is powerful, the controllability is strong, friendly interface, pay more attention to users' experience.
- **Shenchen-CF-EMB** operation system, the core technology is precise angle control technology. Rely on this technology, the precision of this filling system reached international leading level. The filling precision is affected by various factor, expect for control technology, the physical precision of the pump head is also a factor, the two factors guarantee the high precision together.
- **The CF350 dispensing system** uses the specially designed "Low Pulsation" pump head for high precision filling. Through the phase difference between the two sets of rollers, makes the fluid peaks and valleys complementary, then reduce the pulsation of the fluid. Adaptive pressure tubing space, extend the tube lifetime effectively, actually achieves micro flow rate and large flow rate high precision dispensing.
- **With the intelligent calibration function**, the flow and distribution of the amount of liquid can be calibrated to ensure the flow accuracy, suitable for high precision liquid transferring.
- **External control start/stop function**, can connect to foot pedal switch, and realize upper computer unified control or receive stop filling signal when bottle absent when supporting filling production line.

### Product Introduction

CF350 servo control series is split type intelligent filling system with high precision and low pulsation driven by servo motor. It is composed by one control unit and several independent filling units, can arbitrarily add or minus the number of filling units, or finish the same filling request at different place, according to customers' request in different period. One control unit can control 16 independent filling units at the same time. This system use imported 4.3" industrial grade true color display with touch screen control, can preset filling volume, filling time, pause time, copy numbers and back-suction angle, animation display working status, filling data, setting parameter, system configuration display at the same screen; with intelligent calibration and online micro-adjust function. Can connect foot pedal and receive switch signal, realize long-distance control. With motor working status output signal, can let other equipment real-time monitor the current filling status of peristaltic pump. This filling system use servo motor, and **high precision, low pulsation pump head** to make the filling precision higher, up to 0.1%-0.6%, make the micro volume and big volume high precision filling come true.

### Product Introduction

DF servo control series is split type intelligent filling system with high precision and low pulsation driven by servo motor. It is composed by control unit and integrated type filling units, each group have 4 filling units, total 16 filling units. This system use Imported 4.3" Industrial grade true color display with touch screen control, can preset filling volume, filling time, pause time, copy numbers and back-suction angle, animation display working status, filling data, setting parameter, system configuration display at the same screen; with intelligent calibration and online micro-adjust function. Can connect foot pedal and receive switch signal, realize long-distance control. With motor working status output signal, can let other equipment real-time monitor the current filling status of peristaltic pump. This filling system use servo motor, and high precision, low pulsation pump head to make the filling precision higher, up to 0.1%–0.6%, make the micro volume and big volume high precision filling come true.

### Typical Application

- Medicine, health care products filling    Diagnostic reagents filling
- Food, beverage filling    ■ Cosmetic filling

### Features

- **Servo motor drive**, precision control.
- Imported 4.3" industrial grade true color display, clear picture quality, the quality is more guaranteed. Animation display current filling status, display filling volume, filling time, pause time, copy numbers and system configuration at the same screen.
- Imported touch screen control, high hardness, scratch resistance, high sensitivity, pay more attention to users' experience.
- **Shenchen-DF-CIR** electrical system all use Imported chips, fast operation, high performance and work steady.
- **Shenchen-DF-EMB** operation system, use embedded software design, the function is powerful, the controllability is strong, friendly interface, pay more attention to users' experience.
- **Shenchen-DF-EMBShenchen-CF-EMB** operation system, the core technology is precise angle control technology. Rely on this technology, the precision of this filling system reached international leading level. The filling precision is affected by various factor, expect for control technology, the

physical precision of the pump head is also a factor, the two factors guarantee the high precision together.

- **The DF servo control filling system** uses the specially designed "**Low Pulsation**" pump head for high precision filling. Through the phase difference between the two sets of rollers, makes the fluid peaks and valleys complementary, then reduce the pulsation of the fluid. Adaptive pressure tubing space, extend the tube lifetime effectively, actually achieves micro flow rate and large flow rate high precision dispensing.
- With the Intelligent calibration function, the flow and distribution of the amount of liquid can be calibrated to ensure the flow accuracy, suitable for high precision liquid transferring.
- **It has micro adjusting function**. During production process, when the tube fatigue or elasticity decreased, the micro adjusting function can micro adjust the flow rate and avoid the error without the pump stopping.
- The filling system can store 60 commonly used filling modes, save users setting time, and improve working efficiency.

# Filling System (Integrated Type)

- Back suction angle setting, avoid liquid drop off when the pump stop working.
- Effective unit setting**, you can start or stop any filling channel during working, meet different channel numbers request.
- Can arbitrarily add filling units, one control unit can simultaneously control 16 independent filling units. Each filling unit receive stop filling signal when bottle absent, so single channel can stop filling when bottle absent.
- Separate controller and filling units, can install the controller where is convenient to operate.
- Each filling unit use high definition LCD screen, display address number and working status.
- External control start/stop function, can connect to foot pedal switch, and realize upper computer unified control or receive stop filling signal when bottle absent when supporting filling production line.
- Load-shedding memory function**, store the running parameters in time, safe and reliable.
- Fast filling function, not only can be used for washing the tube, but also can fill liquid to the tubing fast.
- Strong anti-jamming feature**, wide voltage design, suitable for complex power supply environment.
- Circuit board spray with three paint, anti-dust, anti-moisture, anti-static, resist corrosion.
- 304 stainless steel housing, conform to GMP sanitary request. Meantime, use seamless welding technology, avoid accidental spilled liquid on the housing infiltrate inside, to protect the inside circuit board.

plastic housing  
LabN Series

**ABS**  
engineering plastic  
housing

LabN1/LabN3/LabN6

#### Installation Sizes Drawing (Unit: mm)

#### Product Introduction

The second generation standard type peristaltic pump, with ABS engineering plastic housing, streamlined body design, more fashion sense. 3.2" blue LCD screen, touch keypad control, feel comfortable. Speed range: 0.1-600 rpm, suitable for various pump heads. **Flow rate range: 0.1-2280ml/min.** Multiple external control for selection. Support RS232/RS485 communication, standard MODBUS protocol (RTU mode), meeting different industrial sites equipment request.

#### Suitable Pump Head

Multichannel  
Pump Head  
(MC1-MC12)

Easy Load  
Pump Head  
(YZ1515x, YZ2515x)

Multichannel  
Pump Head  
(DG1-DG12)

Fast Load Pump Head  
(DZ25-3L)

Standard Pump Head  
(SN15, SN25)

#### Typical Application

- Special for university laboratory and research institute
- Ion chromatography and titrator
- Pilot scale and Industry production

#### Features

- Friendly Interface, 3.2" big screen LCD display working parameters in real time.
- Super silent drive setting, precise control, low vibration and low noise.
- Shenzhen-Nx-CIR circuit system, use imported chips, computing speed fast, reliable performance, working stable.
- Shenzhen-Nx-EMB operating system, using the embedded software design, powerful function, friendly interface, strong control, pay attention to the user experience..
- Touch keypad control, menu interface, convenient for users setting the parameters.
- Timing function, the time range is 0.1s-9999 hours, can be used for simple dispensing function.
- 0-360° back suction angle setting, can avoid the fluid drop off when transferring viscous fluid.
- Automatical temperature control system, reduce the noise of fan effectively.
- Various external control functions, support 0-5V, 0-10V, 4-20mA analog signal control speed. In the mean time also have Shenzhen -Nx-EMB-PGM programmable external control function, can meet special industrial control request.
- Support RS232/RS485 communication interface, MODBUS communication protocol, meet different industrial request.
- Power down memory function, store parameters in time, safe and reliable.
- Strong anti-jamming feature, wide voltage design, suitable for complex power supply environment.
- Circuit board spray with three paint, anti-dust, anti-moisture, anti-static, resist corrosion.

# Standard Peristaltic Pump

## Technical Specifications

| Drive weight                        | 4.40 kg  |
| Power consumption                   | <50W   |
| Environment temperature             | 0~40°C   |
| Relative humidity                   | <80%   |
| IP rate                             | IP31   |

## LabN series appearance features

1. Portable handheld design, feel comfortable and stable.
2. Multifunction protective cover for external control interface, can be used for tool box, install common tools.
3. Hidden external control interface, protective cover can protect the interface and data lines effectively.

## LabN series with various external control

1. Analog signal input port:
  - A. Can choose the analog signal source according with demand: 0~5V, 0~10V, 4~20mA
  - B. After choose the signal source, customer can choose the relative speed with maximum and minimum data of the signal source. In this way, to achieve custom speed range purpose.
  - C. The top limit of the working speed is setting the peristaltic pump maximum working speed when the analog signal and the speed keep linear relationship. This function can avoid the peristaltic pump transferring flow rate sudden change when outside analog signal change suddenly, occur production accident.
2. Inner isolated 5VDC output.
3. External control start/stop, direction signal input port: Active signal input. Can choose switch signal according with users' equipment, high level: 5V (default), 12V, 24V.
4. R/S 1 external control start/stop signal input port: Passive signal input.
5. Motor working status output port: Output motor current working status.
6. RS232 communication port:
  - A. Support RS232/RS485 Interface, can choose this from the software interface.
  - B. Support multiple baud rate communication: 2400bps, 4800bps, 9600bps and 19200bps, can choose this from the software interface.
  - C. Standard Modbus communication protocol is suitable to match with HMI, PLC and other master computer which support standard Modbus communication protocol.

### Product Introduction

The first generation standard type peristaltic pump with ultra quiet working performance. It is widely used in laboratory and complete analytical instruments.

#### Suitable Pump Head

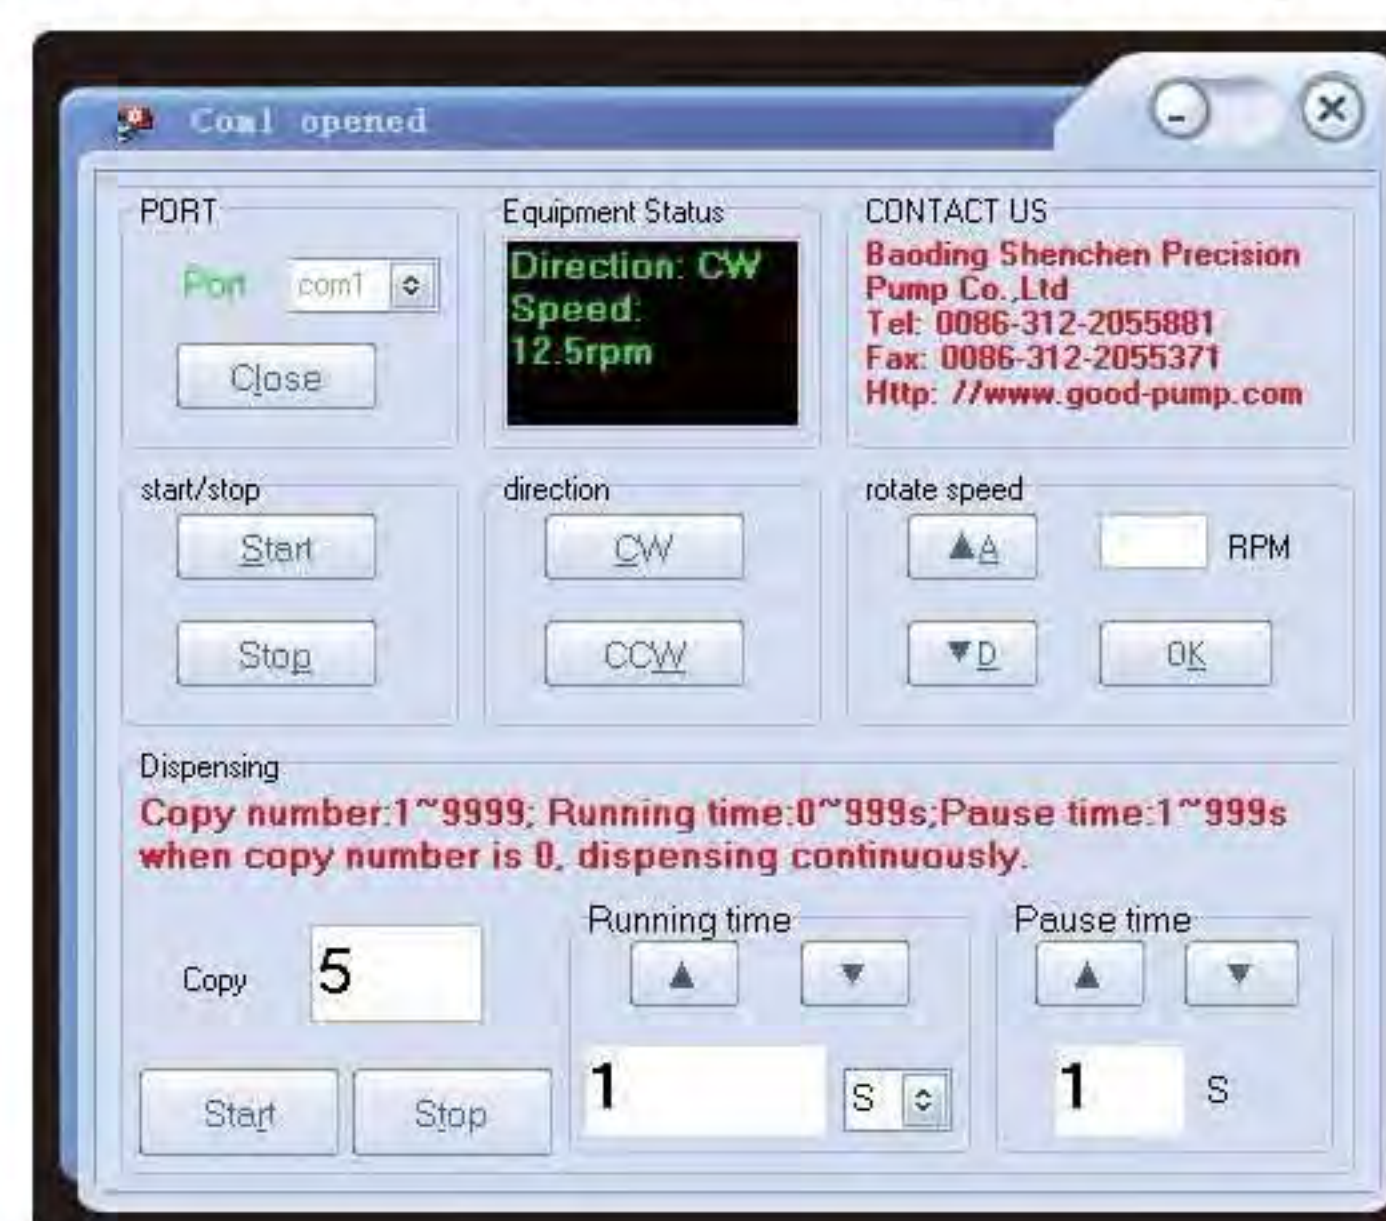

### Typical Application

- Special for university laboratory and research institute
- Ion chromatography and titrator
- Pilot scale and industry production

### RS232/RS485 communication interface

Support Shenzhen communication protocol or standard MODBUS communication protocol.(RTU mode)

### RS232 debug software

The peristaltic pump has a RS232 port, to control start/stop, reverse, speed control, and for dispensing, filling function. According to the request of remote control, it can be getting real-time feedback of the pump filling status.

### Product Introduction

**Servo motor drive** standard type industrial peristaltic pump. Speed range: 0.1-600 rpm, flow rate range: 0.211-12000mL/min. Membrane keypad control start/stop, direction, timing test and external control selection. Rotary encoded switch control the speed, easy operation. 8 different external control ways with RS232/RS485 communication interface ( MODBUS protocol, RTU mode). The pump can be connected with computer, PLC and HMI, achieve external control. Suitable for industrial sites, large flow rate, wide range and high precision liquid transferring.

Operation Panel and External Control Schematic

SHENCHEN  
Industrial field application

## Features

- Servo motor drive, precise control, strong power, low vibration and low noise.
- Shenchen-N-CIR circuit system, use Imported chips, computing speed fast, reliable performance, working stable.
- Shenchen-N-EMB operation system, embedded software design, powerful function, friendly interface, attention to users' experience.
- Membrane keypad control: start/stop, direction, timing test, external control mode selection.
- Rotary encoded switch can identify the target speed intelligently. When the rotation speed fast, the switch increase the adjustment range automatically. When the rotation speed slow, the switch decrease the adjustment range automatically. It is very convenient to adjust the speed. The rotary encoded switch also have full speed function, not only can be used for washing bottles, but also can be used for filling liquid to the tubing.
- Timing test function, time range is 0.5–999 seconds. Setting the test time freely, also can be used for simple dispensing.

Installation Sizes Drawing (Unit: mm)

- 7 different external control ways can be selected from the panel. Analog signals (0–5V, 0–10V, 4–20mA) control speed, switch signal control start/stop and direction.

● — External control enable      ○ — External control forbidden

- RS232, RS485 interface, support MODBUS protocol. Convenient for external control.
- Load-shedding memory function.
- Strong anti-jamming feature, wide voltage design, suitable for complex power supply environment.
- Circuit board spray with three paint, anti-dust, anti-moisture, anti-static, resist corrosion.
- 304 stainless steel housing, comply with pharmaceutical GMP certificate requirement. Meantime, use seamless welding technology, avoid accidental spilled liquid on the housing infiltrate inside, to protect the inside circuit board.
- DZ25-3L, DZ25-6L, YZ35-PPS or aluminum alloy pump head, 304 stainless steel rollers, strong rigidity, high accuracy, reliable performance, excellent quality.

### Installation Sizes Drawing (Unit: mm)

### Product Introduction

The second generation basic type peristaltic pump, with ABS engineering plastic housing, streamlined body design, more fashion sense. Speed range: 0.5-600rpm/min, suitable for various pump heads. **Flow rate range: 0.00034-3600ml/min**. Membrane keypad control, multiple external control for selection. Support RS232/RS485 (standard Modbus protocol) interface, it is easy to connect with computer, PLC, HMI etc.

### Features

- Touch keypad control, not only can adjust speed manually, but can also control automatically through external interface.
- Full speed button: fast filling and emptying function.
- With timed function, time range: 0.5-999s, setting test time freely, can be used for simple dispensing.
- Internal isolate external control design. External control signal have active signal and passive signal, users can use it freely.
- RS232 and RS485 interface. The pump can be controlled by PC through RS232 and serial debugging software, control the pump start/stop, direction and speed. To achieve dispensing and filling function. It also can feedback pump working status according with external control request.
- Good performance drive circuit, good cooling condition, low noise, working stable, power down memory function.
- Super strong anti-jamming feature, wide voltage design, suitable for complex power supply environment.
- Circuit board spray with three anti-paint. Anti-dust, anti-moisture, anti-static, resist corrosion.

### Product Introduction

Basic peristaltic pump with stepper motor driver, speed range: 1-600 rpm, flow rate range: 0.00067-3600mL/min. Toggle switch control start/stop and direction. Digital knob control speed, easy operation, durable. Support external start /stop and multiple external control way. Also support RS485 Interface (MODBUS protocol RTU mode). Easy to connect with computer, PLC and HMI achieve external control. Simple and fast operation, suitable for different industrial site using.

#### Suitable Pump Head

Multichannel Pump Head (MC1-MC12)

Easy Load Pump Head (YZ1515x, YZ2515x)

Multichannel Pump Head (DG1-DG12)

Fast Load Pump Head (DZ25-3L)

Standard Pump Head (SN15, SN25)

### Features

- 'Dual CPU' control, separate control and driver, computing fast, working stable, high precision transferring.
- Shenchen-M-CIR circuit system with imported chips, computing fast, reliable performance, working stable.
- Shenchen-M-EMB control system with embedded software design, powerful function, friendly interface, attention to users' experience.
- Digital knob can identify the target speed intelligently. When the rotation speed fast, the switch increase the adjustment range automatically. When the rotation speed slow, the switch decrease the adjustment range automatically. It is very convenient to adjust the speed. The rotary encoded switch also have full speed function, not only can be used for washing bottles, but also can be used for filling liquid to the tubing.
- Toggle switch control direction and start/stop, easy operation, long lifetime.
- Free external control module: 0-5V, 0-10V, 4-20mA, 3 kind of signal can be used for external control the pump motor speed. Also can control the pump start/stop through switch signal.
- RS485 communication interface, support Shenchen communication protocol and standard MODBUS communication protocol (RTU mode), convenient for external control.
- Power down memory function, save data in time, safe and reliable.
- Strong anti-jamming feature, wide voltage design, suitable for complex power supply environment.
- Circuit board spray with three paint, anti-dust, anti-moisture, anti-static, resist corrosion.

## EXP600

YZ35 pump head

NEW

### Product Introduction

Shenzhen EXP600 explosion-proof pump, driven by explosion-proof motor, the power is strong, the direction is reversible. With poleless speed regulation, the speed can be adjusted manually. High performance, stable flow rate, high torque and low noise, suitable for various pump head and tubing. Can running for a long time continuously, easy for maintenance. Safe and explosion-proof, suitable for various environment, especially for the industrial sites which have inflammable gas or electric problem.

### Features

- **Safe explosion proof**, suitable for sites where have electric problem.
- Poleless speed regulation, reversible.
- Stable flow rate, high torque, low noise, suitable for various pump heads and tubings.
- **Can mount 2 pcs YZ15/25 pump heads to increase the flow rate**. Reduce the pulsation, more stable to transfer the fluid.
- Big flow rate design, **the speed range is 180-600rpm/min**.

# Explosion Proof Peristaltic Pump

## Product Introduction

Shenchen QD600 pneumatic pumps, with pneumatic motor driver. Start/stop, direction, stepless speed control functions. Functional design, pneumatic components can turn with  $>90^\circ$ , convenient for users to check the pressure value. 304 stainless steel housing, with handle, easy to carry. Suitable for various pump head and tubing. Gas driving, explosion proof and safe, suitable for industrial sites where have inflammable gas and request explosion proof or without power supply.

### Suitable Pump Head

Explosion

QD600

## Features

- Gas driven, safe explosion-proof, apply to power hidden trouble or without power supply.
  - Low heat, low temperature -rise
  - 150W Low maintenance motor, large torque, stepless speed regulation.
  - Start/stop, reverse function, overload protection.
  - F.R.L unit direction reversible, when working, it can rotate outward to open and deadlock, convenient for users to observe air pressure value.
  - Stainless steel housing with handle, portable and convenient.
- Note: carefully placed, prevent static electricity, ensure safe operation.**

**UC15**Medical  
Dialysis Pump**NEW**

### Product Introduction

UC15 mechanical spring pump head, widely used for medical dialysis equipment. Functional design, simple atmosphere, practicality; with transparent protective cover, it can observe the operating condition anytime. Output signal of open cover, stop working when open the cover, assure safe operation. Elastic roller assembly, adaptive tubing pressure gap, working smoothly, low noise. Manual spanner, not only can be used for installing tubing, but also can be used for manual rotate the roller assembly press the tubing, complete the liquid transferring.

### Installation Sizes Drawing (Unit: mm)

### Features

- Simple atmosphere appearance, compact structure, with broad flow rate range.
- Elastic roller assembly, adaptive tubing pressure gap, adjustable pressure, extend using life.
- The transparent protective cover, can observe the operation of realtime.
- Manual spanner, can be manual rotation of the roller assembly after power off, complete liquid transferring.
- Manual spanner with clamping hose, to solve the traditional spring pump head hose clamping inconvenience.
- Open the protective cover, output the "stop signal", to ensure the operation safe and reliable.

### Motor data

|                  |   |
|------------------|---|
| Speed range      | 0.1-120 rpm                                 |
| Speed resolution | 0.1 rpm                                     |
| Motor type       | Stepper motor                               |
| Outlet signal    | Open the cover signal (Active signal DC12V) |

### Open cover output signal description

1、Press the down clamp, put the hose into the U shaped groove

2、Put the hose between the two guide posts. Hand spanner, rotate the wheel body.

3、Press the down clamp, put the hose into the U shaped groove

4、Installation is complete.

# Multichannel Pump Head-MC Series

## MC系列

To open the cartridge from upside will be more convenient.

POM Material & PVDF Material

Appearance design patent No.: ZL2011 3 0101376.9  
The utility model patent No: ZL2011 2 0189392.2

## Product Introduction

MC series new generation multichannel pump head with unique cam structure, make it more easy to operate. It is designed for small flow rates and multichannel transfer. Comparing with traditional DG pump head, it has particular cam design for micro adjustment occlusion, and also for opening the cartridge from the top. 304 stainless steel rollers assembly include two structures of 6 rollers and 10 rollers. Install silicone tubing and TYGON series Imported tubing. It is widely used in supporting analytical instruments.

### Installation Sizes Drawing (Unit: mm)

## Model Number

- MC1 MC2 MC3
- MC4 MC5 MC6
- MC8 MC10 MC12

## Typical Application

- Support blood sugar analytical device.
- Support ammonian analytical instrument.

**Note:** Increasing or reducing one channel, the pump head size need to increase or reduce the thickness of one cartridge.

Closed design

### Installation Sizes Drawing (Unit: mm)

**Note:** Increasing or reducing one channel, the pump head size need to increase or reduce the thickness of one cartridge.

## MC Pump vs DG Pump

1. The traditional DG series pump head need to open the cartridge from the bottom. It is very inconvenient to use when the space of the equipment is compact. The MC series pump head just need to open the cartridge from the top, easy to operate.

2. The gear on the MC pump head is smaller than DG, this improved the adjusting resolution.

DG Series

# SHENCHEN Multichannel Pump Head-MC Series

## Tubing Installation Procedure

**A.** Turn the spanner clockwise to take it off from the lever.

**B.** After that, the cartridge can be taken out lightly.

**C.** Install the tubing and confirm the working position between two adjacent clamps.

**D.** Embed the cartridge and press it lightly to reach the working position.

**E.** Turn the spanner counter-clockwise to make it reach the lever.

**F.** Multichannel pump heads and tubing drawing

# Multichannel Pump Head-MD Series

## MD3

NEW

### Product Introduction

Suitable for liquid transferring of small flow rate and multiple channels. Complete compression block design, can improve the accuracy among channels effectively; with the function of micro adjustment occlusion, to micro adjust the flow rate and output pressure.

### Model Number Typical Application

- MD3
- Support analytical instruments

### Features

- Complete compression block design, improve the accuracy among channels effectively.
- Micro adjustment occlusion, not only prolonging tubing use life, but also micro adjust the flow rate and output pressure.
- Embedded design, it is convenient used for various instruments.
- Stepper motor drive, accurate and reliable.
- 0.8-1mm wall thickness of tubing.
- 304 stainless steel roller assembly.

### Installation Sizes Drawing (Unit: mm)

### Tubing Installation Procedure

1. Turn the spanner clockwise

2. Install tubing one by one, inside-out

3. Tubing installation complete

4. Turn spanner anticlockwise, locking the upper block, micro adjust the occlusion.

### Technical Specifications

| Pump head | Channel number | Speed (rpm) | Tubing    | Flow rates (0.1-300rpm)           | Rollers number | Rollers material    | Cartridge material |
|-----------|----------------|-------------|-----------|-----------------------------------|----------------|---------------------|--------------------|
| MD3       | 3              | 0.1-300     | 1×1       | 0.007-20.95 mL/min (each channel) | 8 rollers      | 304 stainless steel | POM                |
|           |                |             | 2×1       | 0.0244-74 mL/min (each channel)   |                |                     |                    |
|           |                |             | 2.79×0.86 | 0.0356-107 mL/min (each channel)  |                |                     |                    |

Note: Can customize channel numbers according with customers' request.

### DG系列

### Product Introduction

The first generation multichannel pump head is used for multichannel transfer micro liquid. Occlusion can be adjusted. Widely used in supporting analytical instruments.

### Features

- Accept 0.13mm-3.17mm ID tubing.
- Easy to change and fix the tubing. Occlusion can be adjusted slightly by ratchet wheel.
- Offer 1,2,4,6,8,12 channels for selection. Non-standard products can be customized according to customer's requirements.
- 304 stainless steel rollers assembly. Provide two roller structures: 6 rollers and 10 rollers.

### Installation Sizes Drawing (Unit: mm)

### Model Number

- DG-1    DG-2    DG-4
- DG-6    DG-8    DG-12

### Typical Application

- Widely used in the analytical instruments and laboratories

DG-4, DG-6, DG-8, DG-12 use unique spanner to open the cartridge

### Technical Specifications

| Pump head               |            | DG-1   | DG-2 | DG-4 | DG-6 | DG-8 | DG-12 |

# Multichannel Pump Head-MT12

## MT12

Higher accuracy between channels

### Product Introduction

12 channels peristaltic pump with the unique complete compression block design, solves the big error problem between channels from traditional multichannel pump heads. The compact structure for saving room, widely used in high precision request of flow rates among channels, such as chemistry analytical Instruments, etc. Accept many kinds of motors drive, such as stepper motor, DC motor and AC motor.

### Model Number

■ MT12

### Typical Application

■ Support the chemistry analytical instruments

### Features

MT12 peristaltic pump is designed specially for increasing the precision among channels. The main body is made from aluminum alloy material. One compression block can press and fix 12 tubes at the same time to improve the transfer consistency and increase the transfer precision between channels.

The opening state drawing of compression block

## YZ1515x

PSF

## Product Introduction

Change the tubing easily and rapidly; automatic tubing retention; accept 9 sizes tubing to meet different flow rates requests. Two kinds of material housing for customers' selection. PSF (polysulphone material): white, exquisite appearance, good rigidity, high precision, usually used in research laboratory and supporting analytical device. PPS (polyphenylene sulfide material): black, resist organic solvent corrosion, high precision and rigidity, suitable for industry or other bad working conditions. Rollers assembly with 304 stainless steel material resists corrosion with long lifetime.

## Model Number

- YZ1515x
- YZ2515x

## Typical Application

- Support COD on-line monitor.
- Support anorectal therapeutic instrument.
- Support biofermentation cylinder.

## YZ2515x

PPS

## Installation Sizes Drawing (Unit: mm)

## YZ35

PPS

Aluminum Alloy

## Product Introduction

YZ35 pump head with aluminum alloy or PPS housing material. 304 stainless steel rollers assembly achieve high precision transferring liquid. Adaptive tubing cartridge structure makes it more easy to load the tubing.

## Model Number

- YZ35
- YZ35-PPS

## Features

- Aluminum alloy and PPS housing.
- 304 stainless steel rollers assembly.
- Large flow rates design: 12L/min

## Installation Sizes Drawing

YZ35-PPS

YZ35-Aluminum Alloy

# Easy Load Pump Head-YZ Series

## Features

- The housing material of white pump head-PSF or PSU(polysulphone)  
PSF material pump head has white and good appearance. It resists high temperature, has long-term usage from -100°C to 150°C, perfect aging resistant performance in the high temperature. PSF pump head can resist corrosion of most inorganic acid, base and salt, but cannot resist organic solvent corrosion. If transfer organic solvent, please choose the PPS pump head.
- The housing material of black pump head—PPS (polyphenylene sulfide)  
PPS material has high molding precision and perfect rigidity. The pump head can achieve long-term running heavily and transfer fluid with high

accuracy. Resist high temperature of 200°C and corrosion especially in the strong chemical corrosion resistance, such as organic solvent, etc.

- Rollers material---304 stainless steel  
Resist corrosion; Not easy to rust; High sanitary grade and low repair rate. All save the cost for customers.

3 rollers

6 rollers

- Suitable for 9 different sizes tubing to ensure the same transfer precision-5%~1% in different flow ranges.

Mounting several pump heads can increase the flow rates.

YZ Series pump head has wide application, and is usually used together with many kinds of analytical instruments. According to the different technical requests, it can adopt different motors to drive, such as stepper motor, DC motor, synchronous motor, AC gear motor, etc. Stack up several pump heads can increase the flow rates.

## Tubing Installation Procedure

A. Move lever to the left according with arrow direction, to open the pump head.

B. Install the correct size tubing.

C. Rotate the lever to the right according with arrow direction, to close the pump head.

D. Working status: Replace the compression block and fix the tubing, then ready for working.

## Technical Specifications

## DZ25系列

## Product Introduction

Easy operation, change tube rapidly. The house material is aluminum alloy or PPS (polyphenyl thioether). 304 stainless steel rollers. DZ25 pump head use 2.4mm wall thickness tube, the flow rate range is 3-6000mL/min. This pump head is suitable for high viscous liquid which include granule and floc. It also suitable for high pressure request. New cartridge structure design, can use the special connector, connect low cost tubing outside the pump head to save cost; also can use flexible tube card, meet hygiene requirement.

## Installation Sizes Drawing (Unit: mm)

DZ25-6L Dimension

DZ25-3L Dimension

## Model Number

■ DZ25-3L ■ DZ25-6L

## Features

- Cartridges and base body is separated. It is convenient to change the tubing.
- New cartridge structure design, can use both the special connector and the flexible tube card.
- Wide flow rate range, accept 15#, 24#, 35# and 36# tubing.
- Pump head is stackable.

## ① Connector

The tubing length is 128mm between both connectors.

## ② Cartridge

DZ25-6L: the tubing length is 125mm between both cartridges.

DZ25-3L: the tubing length is 90mm between both cartridges.

## Tubing Installation Procedure

1. Lift both side levers, take off the upper block.

2. Put the tubing with cartridge or connector into pump housing.

3. Install the upper block, put down the levers to lock the block.

## Technical Specifications

# Low Pulse Pump Head-DY Series

## DY15/DY25

### Product Introduction

The 'low pulse' pump head is designed special for high precision filling. Through the phase difference between the two sets of rollers, make the pulse crest and trough complementary, reducing the fluid pulsation effectively, reach high precision liquid transferring.

### Installation Sizes Drawing (Unit: mm)

### Model Number ■ DY15 ■ DY25

### Pulsation Reduction Schematic Diagram

Three way connector and tubing cartridge schematic diagram

The tubing length is 126mm between two cartridges

Rollers Assembly

### Features

- Complementary phase 304 stainless steel roller assembly, effective reducing the fluid pulsation.
- Pump head housing material is aluminum alloy.
- Using flexible tubing cartridge, install tubing easy and fast.
- The flexible block assembly with adaptive 'tubing gap' function, extend the tubing life effectively.

### Tubing Installation Procedure

1. Lift both side levers, take off the upper block.

2. Put the tubing with cartridge or connector into pump housing.

3. Install the upper block, put down the levers to lock the block.

### Technical Specifications

## SN25/SN15

Installation Sizes Drawing (Unit: mm)

### Product Introduction

Standard pump head with compact structure, exquisite appearance, fixed occlusion and stable running. Can stack several pump heads, and support various equipment.

### Model Number

- SN25
- SN15-16

### Typical Application

- Use in the ice cream machine and coffee making machine
- Support COD on-line monitor

### Tubing Installation Procedure

A. Disassemble the pump head, and press the tubing on the rollers.

B. Make the tubing go around the rollers one cycle, and merge it on the exit.

C. Tighten the tubing aptly, and load the other half pump head body.

UD15

Installation Sizes Drawing (Unit: mm)

### Product Introduction

UD15 pump head, compact structure, embedded design, there is water-proof groove in the pump head mounting side, more suitable for supporting various kinds of equipment. PES material, good rigidity and high precision. Transparent protecting cover, easily to observe the working situation of pump head and tubing at any time. Can use stepper motor, DC motor, AC motor and various driver, the application is widely.

1. As below picture, turn the holding pin to unlocking position

2. Open the transparent cover

3. Install the tubing

4. Close the transparent cover, and turn the holding pin to unlocking position

| Address setting         | 1-32  |
| Motor type              | 42 stepper motor  |
| Input voltage           | DC 24V  |
| Power                   | <30W  |

### OEM-B014 Technical Specification

|                                |   |
|--------------------------------|---|
| Speed range                    | 0.1-300rpm  |
| Flow rate range                | 0.12-190ml/min  |
| Speed control                  | Different dial code to different speed 5-300rpm         |
| External analog signal control | 0-5V, 0-10V, 4-20mA<br>3 analog signal for option       |
| External control               | Start/stop, direction (external passive signal control) |
| Motor type                     | 42 stepper motor  |
| Input voltage                  | DC 24V  |
| Power                          | <30W  |

## OEM-B02, OEM-B03

Outline dimensional drawing

## OEM-B02 Technical Specification

|                      |                                     |
|----------------------|-------------------------------------|
| Speed range          | 0.1–300 rpm                         |
| Flow rate range      | 0.0024–190mL/min                    |
| Speed control        | Preset speed or RS232 speed control |
| Subdivision settings | 1/16                                |
| Motor type           | 42 stepper motor                    |
| Input voltage        | DC 24V                              |
| Power                | <24W                                |

## OEM-B03 Technical Specification

|                   |  |
|-------------------|--|
| Speed range       | 0.1–300 rpm  |
| Flow rate range   | 0.0024–190mL/min                                     |
| Speed control     | External input pulse frequency speed control         |
| Multiple segments | 1/16(recommend), 1, 1/2, 1/4, 1/8, 1/32, 1/64, 1/128 |
| Motor type        | 42 stepper motor                                     |
| Input voltage     | DC 24V   |
| Power             | <24W   |

## OEM-B136, OEM-B137

Outline dimensional drawing

## OEM-B136 Technical Specification

|                    |   |
|--------------------|---|
| Speed range        | 0.1–300 rpm   |
| Flow rate range    | 0.0024–190mL/min  |
| Speed control      | Preset speed or manual control  |
| Control mode       | External passive signal level (normally closed or open) mode; control the start/stop of direction |
| Display (optional) | 0.98 inch OLED screen   |
| Motor type         | 57 stepper motor  |
| Input voltage      | DC 24V  |
| Power              | < 80W   |

## OEM-B137 Technical Specification

|                     |  |
|---------------------|--|
| Speed range         | 0.1–300 rpm  |
| Flow rate range     | 0.0024–190mL/min                                     |
| Speed control       | Pulse frequency speed control                        |
| Logic input voltage | 5V, 12V, 24V(default 5V)                             |
| Multiple segments   | 1/16(recommend), 1, 1/2, 1/4, 1/8, 1/32, 1/64, 1/128 |

## Silicone Tubing

### Platinum-Cured Silicone Tubing

Slightly clarity, smooth surface, low protein binding levels, fewer potential leachable .

Ideal for pharmaceutical and biotechnology use, suitable temperature range -51~238 °C.

### Micro Flow Rates Tubing

| Tubing sizes                |              | 0.13 × 0.86   | 0.5 × 0.86  | 0.86 × 0.86   | 1.52 × 0.86  | 2.06 × 0.86   | 2.4 × 0.86  | 2.79 × 0.86   | 3.17 × 0.86   | 1 × 1   | 2 × 1   | 3 × 1   |

# Peristaltic Pump Tubing

SAINT-GOBAIN Tubing Tygon, PharMed BPT, Norprene etc

|                                 | <b>A</b> Tygon3350   | <b>B</b> Tygon R-3603  | <b>C</b> Norprene Chemical  | <b>D</b> PharMed   | <b>E</b> Norprene A-60-F  |
|---------------------------------|--|--|---|--|---|
|                                 |   |    |    |   |                              |
| <b>Formulation</b>              | Tygon3350  | Tygon R-3603   | Norprene Chemical   | PharMed  | Norprene A-60-F   |
| <b>Application</b>              | Pharmaceutical, cosmetic, medical and auto-analysis application.   | General laboratory, food & beverage, biopharmaceutical, analytical instruments.  | Excellent for chemical processing and general industrial applications. Food and beverage applications where extractables are a concern.   | Cell and tissue culture work and pharmaceutical uses. Also good for light-sensitive samples.   | Ideal for the food, dairy and beverage.   |
| <b>Advantages</b>               | Ultra-smooth; minimizes bacterial growth. Good for mild to medium concentration bases, salts and alcohols; odorless, tasteless, and nontoxic. Transparent. | Inexpensive tubing for general lab application. Nonaging, nonoxidizing. Clear for easy flow monitoring. Handles virtually all inorganic chemicals. Low gas permeability. Smooth bore; good for viscous fluids. High dielectric constant.   | Norprene thermoplastic elastomer outer jacket with chemically inert Tygon® 2075 inner bore for excellent chemical resistance. Plasticizer-free to guard against extractables. Long flex life. Opaque beige. | Great for tissue and cell work-nontoxic and nonhemolytic; long service life minimizes risk of fluid exposure; reduces tubing costs and pump downtime. Opaque to UV and visible light to protect light-sensitive fluids. Heat sealable, bondable, and formable. Extremely low gas permeability. | Heat, ozone, and UV light resistant. Nonaging; nonoxidizing; superior acid and alkali resistance. Opaque beige. |

| <b>Physical characteristics</b> | —————  | Thermoplastic. PVC-based material with plasticizer. Firm (stiff) material. Transparent, clear.   | —————   | Thermoplastic elastomer. Polypropylene-based material with USP mineral oil. Excellent tensile strength. Firm (stiff) material. Opaque, beige.  | —————   |
| <b>Temp. range</b>              | -75 to 450°F<br>(-60~232°C)  | -58 to 165°F<br>(-50~74°C)   | -76 to 165°F<br>(-60~74°C)  | -60 to 270°F<br>(-59~135°C)  | -60 to 275°F<br>(-51~135°C)   |
| <b>Meets classifications</b>    | FDA 21 CFR 177.2600<br>USP Class VI<br>EP 3.1.9.<br>Exceeds 3A standards<br>Manufactured according to GMP.   | FDA 21 CFR 175.300   | None.   | None.  | FDA 21 CFR 177.2600<br>NSF listed (Standard 51)<br>Manufactured according to GMP.                               |
| <b>Cleaning/ Sterilization</b>  | Ethylene oxide gamma irradiation, or autoclave for 30 min, 15psi (1 bar).  | Unaffected by commercial sanitizers (with recommended procedures). Sterilize with ethylene oxide (ETO) or autoclave. To autoclave: Coil loosely in nonlinting cloth or paper, autoclave at 121°C (250°F). 1KG/cm² (15psi) for 30 minutes (tubing will appear milky); air dry at max 66°C (150°F) for 2 to 2 ½ hours until clear. | Sterilize with ethylene-oxide(ETO), autoclave or gamma irradiation up to 2.5Mrad. Repeated autoclaving will not affect overall life.  | Autoclave, ethylene oxide, or gamma irradiation.   | Autoclave.  |

## NE-9000 Peristaltic Dispensing Pump

Featuring **Learn & Repeat™**  
for **Fantastic Productivity!**

- ✓ Pump from a reservoir through replaceable continuous tubing.
- ✓ Pump never comes into contact with fluid.
- ✓ Continuous Pumping. Up to 900 mL/min.
- ✓ Measured dispenses for production filling of bottles.
- ✓ Learn and Repeat™ for quick setup of production dispenses.
- ✓ Computer and foot switch interface.

### Description:

Have a need to accurately fill multiple bottles, vials, or other containers with a liquid? The Learn and Repeat™ mode of the NE-9000 Peristaltic Pump from New Era Pump Systems Inc. makes even the smallest of businesses highly productive right from day one. The NE-9000 is equipped to be used in many settings from the small home based businesses to the large factory floor. The pump can be integrated into existing production lines or simply used stand alone. The NE-9000 comes fully programmable and can be operated manually or with a PC through a RS-232 communication port. Even the most novice of technology users can easily operate the pump stand alone or through the PC. The pump's specialty is in small scale production dispensing. It will fill numerous bottles, vials, etc. with fluids of all types. Equipped for mass production dispensing at a price affordable for the home based business, this pump is a great deal no matter what your purchasing power is. The flow rates vary from a minimum of 0.041 mL/min to a maximum of 904.4 mL/min with 3/16" ID. tubing. Space Saving Chassis: Foot print size of only 7 3/4" x 5 1/4". Won't take up unnecessary space on your laboratory or production bench. Easy-to-use keypad interface.

### Features:

#### Dispense or withdrawal pumping

- Learn and Repeat™
- Foot Switch control available.
- Slow down mode to improve accuracy of dispenses.
- Anti-Drip mode to stop oozing after dispenses.
- Calibration mode to improve accuracy.
- Programmable dispense volumes. Store and select from up to 40 dispenses.
- Non-volatile memory of all operating parameters and pumping program.
- Programmable Phases allowing complex pumping applications and interaction with external devices.
- RS-232 bi-directional control for complete control from a PC. Network up to 100 pumps and other devices.
- Digital logic input: TTL I/O with software filtered control inputs to eliminate glitches and ringing on the control inputs.
- Configurable TTL operational trigger for foot switches and other devices.
- Power Failure Mode: Restarts the Pumping Program after a power interruption.
- Audible Alarm
- Two year warranty
- Includes all the advanced functions and programming features of the NE-1000 family.
- Worldwide power supplies available.
- Comes with 5ft of Norprene Industrial Grade Tubing, other tubing available.

## NE-300 Just Infusion™ Syringe Pump

**\$275** Breakthrough  
**PRICING!**

## Infuses Only!

- Just the features that you want and none that you don't want to pay for
- Does not withdraw, volume target, have computer interface or have programmability

### 3 Easy Steps!

1. Set the syringe diameter
2. Set the infusion rate
3. Start the pump

- Holds small or big syringes up to 60 mL
- Pumps continuously until you stop the pump
- Variable infusion rate can be changed while pumping
- Remembers previous settings on power up
- Power failure mode allows pump to continue pumping after a reset
- Syringe purge mode
- Displays total volume dispensed in mL or  $\mu$ L units
- Maximum pumping rate of 1568 mL/hr with a 60 mL syringe
- Precise reproducible flow rates
- Selectable infusion rates units: mL/hr,  $\mu$ L/hr, mL/min,  $\mu$ L/min

## NE-1000 Single Syringe Pump

High Pressure Syringe Pump

NE-1010: \$830

Continuous Infusion  
Syringe Pump System

Dual-NE-1000: \$1510

Microfluidics Double  
Syringe Pump

NE-1002X: \$1500

### NE-1000 Features:

Accepts 1 syringe from the smallest size available up to 60 mL. A 140 mL syringe can be filled up to 120 mL. NE-1000 & Dual-NE-1000 pumping rate as low as 0.73  $\mu\text{L/hr}$  with a 1 mL syringe or as high as 35.33 mL/min with a 60 mL syringe. NE-1010 pumping rate as low as 1.459  $\mu\text{L/hr}$  with a 1 mL syringe or as high as 127.2 mL/min with a 60 mL syringe. NE-1002X pumping rate as low as .008 nL/hr with a 0.5  $\mu\text{L}$  syringe or as high as 1555  $\mu\text{L/min}$  with a 60 mL syringe.

### The NE-1000 Family of Syringe Pumps Features

- Built for Automation
- Operates stand-alone or from a computer
- Infuses and withdraws
- Applications range from simple infusions to complex pumping programs
- Programmable preset protocols
- Program up to 41 pumping phases: change pumping rates, set dispensing volumes, insert pauses, control and respond to external signals, sound the buzzer.
- RS-232 and TTL logic control interfaces

Two pumps connected with a dual cable create a Dual Pump System allowing for continuous infusion or emulsification. Network, control, and monitor up to 100 pumps with one computer. Worldwide power supplies available. Motor stall detection. Non-volatile memory of all parameters and programming. Upgradeable to the X and X2 advanced firmware versions for gradient pumping and increased program memory. Dispensing accuracy of  $\pm 1\%$ . Unlimited lifetime technical support. Two year warranty. Plus many, many more features!

## NE-4000 Double Syringe Pump

Continuous Infusion  
Double Syringe Pump System  
DUAL-NE-4000: \$1960

Microfluidics Double  
Syringe Pump  
NE-4002X: \$1950

### ***BUILT FOR AUTOMATION***

### **NE-4000 Features:**

Accepts 2 different syringes from the smallest size available up to 60 mL. A 140 mL syringe can be filled up to 120mL. 2 different sized syringes can be used for proportional infusion. NE-4000 & Dual-NE-4000 pumping rate as low as 1.459  $\mu\text{L/hr}$  with a 1 mL syringe or as high as 127.2 mL/min with a 60 mL syringe. NE-4002X pumping rate as low as .008 nL/hr with a 0.5  $\mu\text{L}$  syringe or as high as 1555  $\mu\text{L/min}$  with a 60 mL syringe.

## MultiChannel Syringe Pumps

**NE-1200: \$1500**  
**DUAL-NE-1200: \$3010**

- Holds 2, 4, 6, 8, 10 or 12 syringes of up to 3 cc each
- Infusion rates from 0.454  $\mu\text{L/hr}$  (1 cc syringe) to 121.2 mL/hr (3 cc syringe)
- Higher flow rate models available
- Easy-to-use keypad interface

**NE-1600: \$1500**  
**DUAL-NE-1600: \$3010**

- Holds 2, 4 or 6 syringes of up to 60 cc each or 2 or 4 syringes up to 140 cc each
- Infusion rates from 0.454  $\mu\text{L/hr}$  (1 cc syringe) to 2376 mL/hr (140 cc syringe)
- Higher flow rate models available
- Easy-to-use keypad interface

**NE-1800: \$1500**  
**DUAL-NE-1800: \$3010**

- Holds 2, 4, 6 or 8 syringes of up to 10 cc each
- Infusion rates from 0.454  $\mu\text{L/hr}$  (1 cc syringe) to 342.6 mL/hr (10 cc syringe)
- Higher flow rate models available
- Easy-to-use keypad interface

## The NE-1000 Family of Syringe Pumps Features

- Built for Automation
- Operates stand-alone or from a computer
- Infuses and withdraws
- Applications range from simple infusions to complex pumping programs
- Programmable preset protocols
- Program up to 41 pumping phases: change pumping rates, set dispensing volumes, insert pauses, control and respond to external signals, sound the buzzer.
- RS-232 and TTL logic control interfaces

Two pumps connected with a dual cable create a Dual Pump System allowing for continuous infusion or emulsification. Network, control, and monitor up to 100 pumps with one computer. Worldwide power supplies available. Motor stall detection. Non-volatile memory of all parameters and programming. Upgradeable to the X and X2 advanced firmware versions for gradient pumping and increased program memory. Dispensing accuracy of  $\pm 1\%$ . Unlimited lifetime technical support. Two year warranty. Plus many, many more features!

## NE-1002X Microfluidics Syringe Pump

Continuous Infusion Microfluidics  
Syringe Pump System  
DUAL-NE-1002X: \$3010

OEM Microfluidics Syringe Pump  
NE-502X: \$1100

### NE-1002X Features:

#### Advance Per Step: 4.252232 Nanometers

Smooth pumping at ultra low flow rates. Accepts syringes from the smallest size available up to 60 mL. A 140 mL syringe can be filled up to 120mL. Pumping rate as low as 0.008 nL/hr with a .5  $\mu$ L syringe or as high as 1246  $\mu$ L/min with a 60 mL syringe. Includes the X Upgrade Smooth Linear/Gradient increasing and decreasing pumping feature.

### The NE-1000 Family of Syringe Pumps Features

- Built for Automation
- Operates stand-alone or from a computer
- Infuses and withdraws
- Applications range from simple infusions to complex pumping programs
- Programmable preset protocols
- Program up to 41 pumping phases: change pumping rates, set dispensing volumes, insert pauses, control and respond to external signals, sound the buzzer.
- RS-232 and TTL logic control interfaces

Two pumps connected with a dual cable create a Dual Pump System allowing for continuous infusion or emulsification. Network, control, and monitor up to 100 pumps with one computer. World-wide power supplies available. Motor stall detection. Non-volatile memory of all parameters and programming. Upgradeable to the X and X2 advanced firmware versions for gradient pumping and increased program memory. Dispensing accuracy of  $\pm 1\%$ . Unlimited lifetime technical support. Two year warranty. Plus many, many more features!

## OEM Syringe Pumps NE-500

### OEM Syringe Pump

**NE-500: \$495**

### OEM Syringe Pump with Stall Detection

**NE-501: \$550**

### High Pressure OEM Syringe Pump

**NE-510: \$535**

### High Pressure OEM Syringe Pump with Stall Detection

**NE-511: \$535**

### Double OEM Syringe Pump

**NE-4500: \$625**

### Double OEM Syringe Pump with Stall Detection

**NE-4501: \$680**

- Computer controllable: networkable up to 100 pumps
- Stand-alone operation: pre-program the pump with a dispensing program, then operate the pump from an attached Foot Switch, button, or I/O controller
- Add the OEM Starter Kit to run as a fully functional, stand-alone pump.
- Designed for OEM applications, this pump has the same mechanisms and electronics as the NE-1000 aside from the front panel controls.
- Operates from a computer or a foot switch
- Infusion and withdrawal
- Set a single pumping rate and/or dispensing volume
- Program up to 41 pumping phases that change pumping rates, set dispensing volumes, insert pauses, control and respond to external signals, sound the buzzer
- Network, control, and monitor up to 100 pumps with one computer
- Motor stall detection available in NE-501 model (\$550)
- Dispensing accuracy of  $\pm 1\%$

**For Custom Designed OEM Syringe Pumps please call or e-mail for a quote.**

Custom Chassis, Firmware and Mechanical Design. You want it, we'll make it, **no matter how simple or complex**. When others say it can't be done, we say of course **it can be done**. The limits are endless to what we can create for you. We here at New Era have been designing pumps for over ten years for all types of OEM applications.

## OEM Syringe Pump Accessories

### OEM Starter & Net Kits

**Model: OEM-STARTER**

**Price: \$25**

- Allows user to interactively communicate to the pump with a computer
- Includes: power supply, Pump-to-PC network cable and user manual

**Model: OEM-NET**

**Price: \$15**

Power supply and secondary cable only. For use when networking two or more OEM NE-500 syringe pumps together. Must use the secondary cable in order to complete this application.

### Foot Switch

**Model: ADPT-FOOTSW-2**

**Price: \$25**

- Start, stop, or send a signal to a pumping program
- Attach to any of the NE-1000 family pumps to allow remote operation
- Utilizes the TTL logic port on the pump
- Quick and simple setup

## Continuous Infusion/Dual NE-1000 Syringe Pump

### Description:

Two NE-1000 Family of Syringe Pumps connected together are often used in dual-pump setups, possibly with check valves for continuous pumping or mixing so that one syringe dispenses while the other reloads. Gives customer flexibility to separate pumps for individual use.

- Dual NE-1010:
- Dual NE-4000:
- Dual NE-1600/1800:
- Dual NE-1002X:

Includes all of the features of the NE-1000 family of pumps

### Dual Pump Plumbing Kit

### Description:

- For use with our continuous infusion system or dual infusion system
- Provides a dual check valve for two syringes, withdraw will pull fluid from a reservoir and infusion will output into a separate line
- The kit is pre-assembled, all you need to do is plug in the syringes
- Each dual check valve uses 6" of 1/8" tubing to connect to a Y connector, one for reservoir and one for output; each Y-connector has 5' of tubing to make connections to your application.
- Two 60 cc Terumo syringes are included.
- Individual parts are also available.

Model: P-DKIT

## Continuous NE-1000X

(Model: Dual-NE-1000X)

### *The Next Generation*

## Continuous Infusion Syringe Pump System

### Eliminates Flow Rate Pauses & Drop-Offs!

Eliminates the problem of flow rate drop-off found in "Push-Pull" syringe pumps. In these "Push-Pull" systems, one pump is refilling while the other infuses and then they switch directions. That switch of directions causes a pause or drop in flow. The Continuous NE-1000X's continuous pumping mode eliminates the flow rate drop offs and pauses.

### How it Works:

- Refilling pump refills the syringe at a faster rate than the infusing pump, giving it time to prime the syringe.
- Refilling pump pauses and waits for the infusing pump to empty.
- When the pumps switch directions, the refilled pump is primed and starts infusing at the set rate immediately.

### Features:

- Two NE-1000X Family of Syringe Pumps connected together via a Dual Pump Sync Cable.
- Continuous Pumping Mode provides a precise continuous flow without any drop-offs or pauses.
- Programmable infusion, refill and prime rates and syringe overlap and prime volumes.
- Flexibility for the pumps to perform either continuous flow, emulsification, or independently at any time.

### NE-1000X Family of Syringe Pumps Features

- Built for Automation
- Operates stand-alone or from a computer
- Infuses and withdraws
- Applications range from simple infusions to complex pumping programs
- Programmable preset protocols
- Program up to 41 pumping phases that change pumping rates, set dispensing volumes, insert pauses, control and respond to external signals, sound the buzzer
- RS-232 and TTL logic control interfaces
- Network, control, and monitor up to 100 pumps with one computer
- Gradient ramping of flow rates
- Worldwide power supplies available
- Motor stall detection
- Non-volatile memory of all parameters and programming
- Upgradeable to 340 pumping phases program memory with the X2 Upgrade
- Dispensing accuracy of +/-1%
- Unlimited lifetime technical support
- Two year warranty
- Plus many, many more features!

### Dual Pump Plumbing Kit - Model: P-DKIT

- For use with our continuous infusion system or dual infusion system.
- Provides a dual check valve for two syringes, withdraw will pull fluid from a reservoir and infusion will output into a separate line.
- The kit is pre-assembled, all you need to do is plug in the syringes.
- Each dual check valve uses 6" of 1/8" tubing to connect to a Y connector, one for reservoir and one for output; each Y-connector has 5' of tubing to make connections to your application.
- Two 60cc Terumo syringes are included.
- Individual parts are also available.

## Upgrade Options

Higher Pressure, Speed & Power Upgrade Options

### X Version Upgrade

#### Upgraded Features to the standard NE-1000 firmware:

- Linear/Gradient Program Function
- Dual Pump Next Generation Continuous Pumping Mode
- Dual Pump Constant Flow Rate Gradient Pumping Mode
- Additional programming functions for more complex pumping programs
- Syringe Pumps, Syringes & Plumbing Supplies sold separately
- **Any syringe pump can be field upgraded except for the NE-300**

**MODEL: FW-1-X is only available for the NE-1000 series models**

(NE-1000 series models included are the **NE-1000**, **NE-4000** and the **Multi-Pumps**)

**MODEL: FW-5-X is only available for the NE-500 series models**

**MODEL: CBL-DUAL-3 is required to connect 2 pumps for use with dual pump modes**

X2 Version Upgrade: Increases the maximum number of programmable pumping phases from 41 to 340.

**MODEL: FW-1-X2 is only available for the NE-1000 series models**

(NE-1000 series models included are the **NE-1000**, **NE-4000** and the **Multi-Pumps**)

**MODEL: FW-5-X2**

**FW-1-X2 is only available for the NE-500 series models**

#### **Linear/Gradient Function Pump Features:**

- Smooth linear increasing or decreasing gradient pumping
- Set the start pumping rate, end pumping rate and the time
- Pre-program multiple gradients including any other NE-1000 programming feature

#### **Requirements for Dual Pump Modes:**

- Any combination of 2 syringe pumps with X firmware upgrades
- Dual pump communications cable **Model # CBL-DUAL-3**

Linear Gradient

**The Next Generation Continuous Infusion System** eliminates the problem of flow rate drop offs and pauses caused by push-pull syringe pumps. Please visit our Continuous NE-1000X page and learn how the system works.

Constant Flow Rate

#### **Constant Flow Rate Gradient Pumping Mode:**

- Set pump 1 linear function
- Pump 2 automatically pumps inversely to pump 1
- Sum of pump 1 and pump 2 flow rates remains a constant rate

## Syringe Heater Kit

Model: HEATER-KIT-1LG

Model: HEATER-PAD2-1LG

### Description for HEATER-KIT-1LG:

Heating device for syringes that requires temperature-controlled dispensing. Heats up to 185°C.

#### Compatibility Notes:

- Please contact us at 631-249-1392 or [info@syringepump.com](mailto:info@syringepump.com) about pump compatibility when heating syringes above 100°C. Customization may be required.
- If you are in a country where the voltage is above 120V, you must purchase a step-down transformer with the Heater Kit.
- Digitally set the heater set point
- Temperature sensor in heating pad
- Set point and other parameters retained in memory
- Controller will heat the syringe and hold the set temperature using an on/off or Thermo-kinetic control algorithm.
- Multiple syringe heater pads can be attached to the control unit, under restricted conditions.
- Heated syringe can be mounted on a syringe pump. Please call 631-249-1392 for compatibility.
- Dual temperature sensors in primary heating pad.
- Heater Kit includes Control-Unit power cable and Primary-Syringe-Heater-Pad.

### Description for HEATER-PAD2-1LG:

For attaching a second heating pad to HEATER-KIT-1LG. Temperature is sensed in primary heating pad only.

#### Compatibility Notes:

- Heater pad measures 75 mm x 75 mm
- Each syringe heater control unit uses only the primary heating pad to sense temperature. All secondary heater pads connected to that control unit function according to temperature at the primary heater pad. Careful consideration should be taken when using secondary/slave heater pads. For different temperatures or variable environments, use separate control units with primary heater pads.
- Plugging more than 12 Syringe-Heater-Pads onto one Controller is not recommended

Model: HEATER-PAD3-1LG

### Description for HEATER-PAD3-1LG:

- For attaching additional, up to 12 total, heating pads to HEATER-KIT-1LG with HEATER-PAD2-1LG
- Temperature sensed in primary heating pad only

## Featured Accessory: Anabox Analog Sensor Interface

Model: ADPT-ANABOX-11

### Sample Anabox Operational Modes:

#### Ramping (gradient) with Voltage

#### Pressure Controlled Infusion

Automatically varies the pumping rate to maintain a pressure by utilizing your pressure sensor with a voltage output.

#### Start Pump at Voltage Trigger

#### Stop Pump at Voltage Trigger

#### Start Pump within Voltage

#### Stop Pump within Voltage

### ANABOX CLOSED LOOP ANALOG SENSOR INTERFACE

- Vary the pumping rate in proportion to a variable voltage input
- Start or stop pump at set voltages
- Vary the pumping rate to maintain a voltage window (i.e. maintain a pressure or pH level)
- Attaches to any pump in the NE-1000 Family
- Operates stand alone. Does not need a computer to operate.
- Optionally outputs event data to a computer for data logging

### Foot Switch

#### Description:

- Start, stop, or send a signal to a pumping program.
- Compatible with any New Era pump excluding the NE-300 Just Infusion
- Utilizes the TTL logic port on the pump
- Quick and simple setup
- 20 ft. length cable

Model: ADPT-FOOTSW-2

## Valve Control Boxes

### Single Valve Control Box

#### Description:

- Attach your 12V DC valve and the control box will open or close your valve according to the pumping direction
- Utilizes the TTL logic port on syringe pump
- Includes power supply for valve

**Model: ADPT-VALVE-INTERFACE-1**

### Dual Valve Control Box

#### Description:

- Attach your two 12V DC valves and the control box will open or close your valves according to the pumping directions of your two pumps
- Includes CBL-TTL-1 cable to allow synchronized pumping between two pumps
- Utilizes the TTL logic ports on both syringe pumps
- Includes power supply for valves

## Pump Cables & Accessories

### Pump-to-PC Primary Network Cable

Model: CBL-PC-PUMP-7

Model: CBL-PC-PUMP-25

#### **Description:**

- Allows full control over syringe pumps through your computer
- DB-9 adapter connects to 9-pin serial port (25-pin adapters available upon request)
- Utilizes the RS-232 communications port of syringe pump
- Available in 7' and 25' length cable
- Quick and simple setup

### Pump-to-Pump Secondary Network Cable

Model: CBL-NET-7

Model: CBL-NET-25

#### **Description:**

- Allows networking of two or more syringe pumps to a single computer
- Quick and simple setup
- Utilizes the RS-232 communications port of syringe pump
- Available in 7' and 25' length cable
- Requires first pump to be connected with primary network cable

### RS-232 to USB Converter

#### **Description:**

- Adapter to add a DB-9 RS-232 serial port to your computer by using an USB port
- Includes software driver CD

Model: CBL-USB232

### Lockout Disable Key

#### **Description:**

- For use with the syringe pump's Lockout Mode
- Prevent unauthorized or accidental changes to the settings by locking the keypad
- Unlocks the keypad and allows settings to be changed
- Utilizes the TTL logic port on syringe pump
- Quick and easy setup

Model: ADPT-LOCKOUT

### Pump Synchronization Cable

Model: CBL-DUAL-3

#### **Description:**

- Used for creating a continuous or dual infusion system
- Establishes a communications link between two pumps to duplicate the exact or inverse commands issued to one pump.
- Utilizes the RS-232 logic port on syringe pump
- Quick and simple setup
- This is the new replacement cable for CBL-TTL-1 unless the use of the TTL ports for synchronization is preferred

## SyringePumpPro Control Software for Syringe Pumps

### Syringe Pump Control Software

Control programmable infusion syringe pumps including Microfluidic, Peristaltic and OEM models.

SyringePumpPro is an easy to use computer interface for programmable syringe pumps. It permits faster programming and operation of one or more pumps. You can create pump programs and upload them to your pumps.

Experience friendly effective software support like never before.

- Synchronously start and stop multiple pumps
- Configure and control multi-pump protocols
- Eliminates hours of manual pump operation
- Monitor pump parameters
- Upload pump programs
- End front panel button mashing
- OEM Pump? No Keypad?
- Send commands to one or many pumps
- No more re-typing of commands in terminal software
- Quick and easy to use interface for communicating with your pumps

Compatible with following brands

### Large Syringe Kit Model: P-SYRKIT-LG

- (2) 20mL Luer Lock Inert
- (2) 30mL Luer Lock Inert
- (2) 60mL Terumo Luer Lock Non-Inert
- (6) Female Luer Barbs
- (3) Male Luer Barbs
- (20 ft) Tubing .125" ID, .188" OD, PVC

### Small Syringe Kit Model: P-SYRKIT-SM

- (2) 1mL Luer Lock Inert
- (2) 3mL Luer Lock Inert
- (2) 5mL Luer Lock Inert
- (2) 10mL Luer Lock Inert
- (6) Female Luer Barbs
- (3) Male Luer Barbs
- (20 ft) Tubing .125" ID, .188" OD, PVC

### Dual Pump Plumbing Kit Model: P-DKIT

- For use with our continuous infusion system or dual infusion system (Dual-NE-1000). Provides a dual check valve for two syringes, withdraw will pull fluid from a reservoir and infusion will output into a separate line.
- The kit is pre-assembled, all you need to do is plug in the syringes.
- Each dual check valve uses 6" of 1/8" tubing to connect to a Y connector, one for reservoir and one for output; each Y-connector has 5' of tubing to make connections to your application.
- Two 60cc Terumo syringes are included.

# New Era Pump Systems, Inc.

## Glass Syringes: Standard & Gas Tight

New Era supplies a full range of glass syringes from 50 $\mu$ L to 100mL in gas tight quality and 1mL to 100mL in standard quality. Standard glass can handle between 22 to 43psi while the gas tight can handle from 100psi to upwards of 400psi depending on the syringe.

### Standard Glass Syringes

| Part #      | Size  | PSI/KPA Limits | Temp Limits | Price Each |
|-------------|-------|----------------|-------------|------------|
| SYR-GL1LL   | 1mL   | 43.5 / 300     | 200°C       | \$30.00    |
| SYR-GL2LL   | 2mL   | 43.5 / 300     | 200°C       | \$20.00    |
| SYR-GL3LL   | 3mL   | 43.5 / 300     | 200°C       | \$20.00    |
| SYR-GL5LL   | 5mL   | 43.5 / 300     | 200°C       | \$20.00    |
| SYR-GL10LL  | 10mL  | 29 / 200       | 200°C       | \$28.00    |
| SYR-GL20LL  | 20mL  | 29 / 200       | 200°C       | \$30.00    |
| SYR-GL30LL  | 30mL  | 29 / 200       | 200°C       | \$54.00    |
| SYR-GL50LL  | 50mL  | 21.8 / 150     | 200°C       | \$75.00    |
| SYR-GL100LL | 100mL | 21.8 / 150     | 200°C       | \$275.00   |

- Tips are Metal Luer Lock
- Barrel and plunger are made from Borosilicate Glass and are interchangeable
- Manufactured in Germany
- Chemically compatible for a wide range of applications
- Good basic reusable syringe

### SGE Gas Tight Glass Syringes

| Part #          | Size        | PSI/KPA Limits | Temp Limits | Price Each |
|-----------------|-------------|----------------|-------------|------------|
| SYR-GL50MCLL-S  | 50 $\mu$ L  | 400 / 2758     | 70°C        | \$59.00    |
| SYR-GL100MCLL-S | 100 $\mu$ L | 400 / 2758     | 70°C        | \$59.00    |
| SYR-GL250MCLL-S | 250 $\mu$ L | 400 / 2758     | 70°C        | \$57.00    |
| SYR-GL500MCLL-S | 500 $\mu$ L | 400 / 2758     | 70°C        | \$54.50    |
| SYR-GL1LL-S     | 1mL         | 400 / 2758     | 70°C        | \$56.50    |
| SYR-GL2.5LL-S   | 2.5mL       | 400 / 2758     | 70°C        | \$54.00    |
| SYR-GL5LL-S     | 5mL         | 400 / 2758     | 70°C        | \$51.90    |
| SYR-GL10LL-S    | 10mL        | 200 / 1379     | 70°C        | \$71.50    |
| SYR-GL25LL-S    | 25mL        | 100 / 689      | 70°C        | \$162.50   |
| SYR-GL50LL-S    | 50mL        | 100 / 689      | 120°C       | \$205.00   |
| SYR-GL100LL-S   | 100mL       | 100 / 689      | 120°C       | \$303.00   |

- Longest working life in the industry
- All SGE syringes come with metal Fixed Luer Lock Tips except for the 50 & 100 mL which are removable.
- Suitable for chromatography applications
- Barrel made from Borosilicate Glass
- PTFE tipped plunger
- Able to replace the plunger
- Nickel plated brass barrel flange
- Manufactured in Australia
- Chemically compatible for a wide range of applications.

# New Era Pump Systems, Inc.

## Stainless Steel Syringes

New Era supplies a full range of stainless syringes from 1mL to 200mL. The syringes can handle 750psi (1500psi for the 8mL), high temperatures and highly corrosive chemicals. Highly corrosive chemicals may require an upgrade in O'Ring.

| Part #        | Size  | PSI  | Included Fitting    | Price each |
|---------------|-------|------|---------------------|------------|
| SYR-SS1       | 1 mL  | 750  | None, 1/4-28 Thread | \$325.00   |
| SYR-SS1SL8    | 1 mL  | 750  | 1/8 SwageLok        | \$385.00   |
| SYR-SS1SL16   | 1 mL  | 750  | 1/16 SwageLok       | \$385.00   |
| SYR-SS1LL     | 1 mL  | 750  | Luer-Lok            | \$385.00   |
| SYR-SS3       | 3mL   | 750  | None, 1/4-28 Thread | \$365.00   |
| SYR-SS3SL8    | 3mL   | 750  | 1/8 SwageLok        | \$425.00   |
| SYR-SS3SL16   | 3mL   | 750  | 1/16 SwageLok       | \$425.00   |
| SYR-SS3LL     | 3mL   | 750  | Luer-Lok            | \$425.00   |
| SYR-SS5       | 5 mL  | 750  | None, 1/4-28 Thread | \$400.00   |
| SYR-SS5SL8    | 5 mL  | 750  | 1/8 SwageLok        | \$475.00   |
| SYR-SS5SL16   | 5 mL  | 750  | 1/16 SwageLok       | \$475.00   |
| SYR-SS5LL     | 5 mL  | 750  | Luer-Lok            | \$475.00   |
| SYR-SS8       | 8mL   | 1500 | None, 1/4-28 Thread | \$400.00   |
| SYR-SS8SL8    | 8mL   | 1500 | 1/8 SwageLok        | \$475.00   |
| SYR-SS8SL16   | 8mL   | 1500 | 1/16 SwageLok       | \$475.00   |
| SYR-SS8LL     | 8mL   | 1500 | Luer-Lok            | \$475.00   |
| SYR-SS20      | 20mL  | 750  | None, 3/8-24 Thread | \$510.00   |
| SYR-SS20SL4   | 20mL  | 750  | 1/4 SwageLok        | \$575.00   |
| SYR-SS20SL8   | 20mL  | 750  | 1/8 SwageLok        | \$575.00   |
| SYR-SS20SL16  | 20mL  | 750  | 1/16 SwageLok       | \$575.00   |
| SYR-SS20LL    | 20mL  | 750  | Luer-Lok            | \$575.00   |
| SYR-SS50      | 50mL  | 750  | None, 3/8-24 Thread | \$595.00   |
| SYR-SS50SL4   | 50mL  | 750  | 1/4 SwageLok        | \$650.00   |
| SYR-SS50SL8   | 50mL  | 750  | 1/8 SwageLok        | \$650.00   |
| SYR-SS50SL16  | 50mL  | 750  | 1/16 SwageLok       | \$650.00   |
| SYR-SS50LL    | 50mL  | 750  | Luer-Lok            | \$650.00   |
| SYR-SS100     | 100mL | 750  | None, 3/8-24 Thread | \$685.00   |
| SYR-SS100SL4  | 100mL | 750  | 1/4 SwageLok        | \$750.00   |
| SYR-SS100SL8  | 100mL | 750  | 1/8 SwageLok        | \$750.00   |
| SYR-SS100SL16 | 100mL | 750  | 1/16 SwageLok       | \$750.00   |
| SYR-SS100LL   | 100mL | 750  | Luer-Lok            | \$750.00   |

| Part #        | Size  | PSI | Included Fitting    | Price each |
|---------------|-------|-----|---------------------|------------|
| SYR-SS200     | 200mL | 750 | None, 3/8-24 Thread | \$750.00   |
| SYR-SS200SL4  | 200mL | 750 | 1/4 SwageLok        | \$825.00   |
| SYR-SS200SL8  | 200mL | 750 | 1/8 SwageLok        | \$825.00   |
| SYR-SS200SL16 | 200mL | 750 | 1/16 SwageLok       | \$825.00   |
| SYR-SS200LL   | 200mL | 750 | Luer-Lok            | \$825.00   |

## Stainless Steel Syringe O-Rings

Stainless steel syringes come standard with a Viton O-Ring. Chemraz® O-Rings are ordered separately and are for applications requiring higher chemical resistance.

| Part #        | Description                          | Price each |
|---------------|--------------------------------------|------------|
| SYRP-SSORV5   | Viton, 5mL Replacement O'Rings       | \$25.00    |
| SYRP-SSORK5   | Chemraz® 5mL O'Rings                 | \$250.00   |
| SYRP-SSORV8   | Viton 1, 3 & 8mL Replacement O'Rings | \$25.00    |
| SYRP-SSORK8   | Chemraz® 1, 3 & 8mL O'Rings          | \$250.00   |
| SYRP-SSORV20  | Viton, 20mL Replacement O'Rings      | \$25.00    |
| SYRP-SSORK20  | Chemraz® 20mL O'Rings                | \$270.00   |
| SYRP-SSORV50  | Viton 50mL Replacement O'Rings       | \$25.00    |
| SYRP-SSORK50  | Chemraz® 50mL O'Rings                | \$420.00   |
| SYRP-SSORV100 | Viton 100mL Replacement O'Rings      | \$25.00    |
| SYRP-SSORK100 | Chemraz® 100mL O'Rings               | \$420.00   |
| SYRP-SSORV200 | Viton 200mL Replacement O'Rings      | \$25.00    |
| SYRP-SSORK200 | Chemraz® 200mL O'Rings               | \$460.00   |

## Stainless Steel Syringe Fittings

You can buy stainless steel syringes with or without fittings. They are also available to be purchased separately if needed. All fittings are pressure rated for all syringes they connect to.

## Need to heat your syringe?

The Syringe Heater Kit, you can find in the accessory section will heat all sizes of syringes up to 220°C.
