Filtration

MS® Filtration Products

Membrane filters are polymer films with specific pore sizes and mechanical properties that separate particles and molecules based on size and charge. They are used in a wide range of applications, from laboratory research to industrial processes. MS® Filtration Products are available in a variety of materials, pore sizes, and filter sizes. Please refer to the product literature for a complete list of products.

MS® Reusable Syringe Filter

Introduction: MS® Reusable Syringe Filters are designed for repeated use in laboratory and industrial applications. They feature a robust housing and a replaceable filter element, providing a cost-effective and sustainable filtration solution.

Features:

- Reusable design
- High flow rate
- Wide range of materials and pore sizes
- Compatible with various syringes and tubing

Electronic Rechargeable Crimpers and Decappers

- Easy to use, comfortable grip
- Hundreds of operations from one charge
- Adjustable crimping force
- Large battery allows for faster charge cycle
- All kits include a universal plug set for the battery charger
- For 11 mm and 20 mm caps
- One-year warranty
